

September Recap

October 1, 2025

Empower Education

SEPTEMBER 2025

DEVELOPMENT OF NEW APP!

An exciting new app is being developed in collaboration with a student, inspired by the Empower Education website. The app will make it easier for people to donate and learn about opportunities directly from their phones without needing a computer. This project highlights creativity and student leadership within Empower Education. For more information, please contact Prerana Codur at prerana.codur@gmail.com.

PEACEFEST RECAP

Empower Education had a successful time at PeaceFest, hosting a fun and interactive face-painting booth. The activity attracted many students and families, helping spread awareness about Empower Education's mission while earning new sign-ups. Overall, PeaceFest was a great opportunity to connect with the community and highlight the organization's creativity and impact.

N&W COMMITTEE - LAW

A new committee was introduced at this meeting, the Law Committee, led by Ranisha Sunki and Zoe Richardson. This subcommittee will focus on exploring legal topics, discussions, and initiatives within the organization. Members who have questions or are interested in joining can contact Ranisha Sunki at ertugrulemre295@gmail.com or 346-522-5469, or Zoe Richardson at elinzoe22@gmail.com or 281-608-0639.

18	19	20	21	22	23	24
25	26	27	28	29	30	

AROUND THE WORLD

They are currently working on their video about Taiwan, with the goal of completing it by next month so it can be shared. They have just uploaded their videos on Germany and Singapore to the Empower Education YouTube channel for the kids in Uganda to watch.

STEM

The STEM Committee recently completed a solar system video project, with each member covering a different planet. They are now creating a YouTube playlist for their STEM content and planning to sell CAD-modeled fidget toys for fundraising. The next project will focus on Earth's biomes through a series of educational videos.

VAPA

They are working on visual art booklets and planning new fundraisers to support art and general school supplies. One member, Vic, has completed a booklet on landscapes, with more booklets currently in progress.

MEDICINE

The Medicine Committee is working on an educational video about the cardiovascular system, and the BizBuddies collaboration has been submitted for review. Personal projects are ongoing, including a booklet being prepared to send to Yona. One highlight is "Meet the Parts of a Neuron," a booklet created for kids with limited English proficiency. It explains the parts of a neuron in a simple, engaging way, using pictures and fun facts to make it more enjoyable to read. The committee is also encouraging everyone to donate \$5 this month to support their efforts.
