____ Session

S. RES. # _____

Repeal of the Real ID Act of May 11, 2005 and The Federal ID License Installation of October 2020

IN THE CONGRESS OF THE UNITED STATES

Mr. _____ Mrs. _____ Mr. _____ Mrs. _____ submitted
the following resolution which was referred to the Committee on ____ - ____ -20 20

RESOLUTION

To Repeal of the Real ID Act of May 11, 2005 and The Federal ID License Installation of October 2020

And to Repair the Damage to American Citizen's Privacy, and to

Institute more efficient method of identification of non-American entities without violating our
constitutional liberties.

A FREE AMERICA CAN NOT EXIST IN A SUSTAINED SEVERE SURVEILLANCE STATE

We the Senate of the United States of America do hereby set forth this resolution to repeal the Real ID Act of May 11, 2005 and its subsequent product of the Federal ID Driver's License, which was slated to full installation on October 1st of 2020.

In reconsideration of it's obvious flaws and offenses to the liberty of our American citizens, and to stop the unnecessary and excessive invasion of privacy and to assure that all Americans may freely access the government buildings that they support with their taxes, and freely access the processes of governing themselves therein, we determine to set forth new hearings and to update research on this issue as well.

This is not to deny that the terrorism of the past two decades doesn't warrant solutions, but rather to state that the current proposal and its demands upon many Americans, is extreme and unacceptable. We admit it did not clear these concerns in any unanimous vote of the sessions of the original Real ID committee, but was rather attached, instead as a rider to the bill into which it was signed as law on May 11, 2005. Therefore, to revisit these issues is not unwarranted, in view of the level of current complaint from ordinary citizens (*already attempting to comply with demanded documents they must compile*), and the

complaint of tag office employees, local law enforcement agencies and others who express concern of belated or yet withheld notification and training, and thus, the anticipation of panic from general public that they must serve and answer to.

Whereas: The Federal License ID is not acceptable in it's current protocol as it would prohibit the access to the following institutions and the processes therein to govern one's self in daily life, without it on one's person: (Any local, or federal installation: such as Police Stations, Welfare Centers, Medicare and IRS Tax Centers, Social Security Offices, Courthouses, City Halls, State Houses, Train Stations, Toll Road passage, Subway Stations, Military recruiting centers, the ability to obtain a car tag renewal, Amtrak, Federal Buildings in Washington DC. And by 2020, to freely traverse the various hallways and offices within those buildings without scanning one's ID each time.)

Whereas: the barcode on the back (and what information it contains and will store of a person's past and future) must be re-examined in light of constitutional liberties and concerns. Investigation is warranted of its origins with earlier proposals of the SDGS UN 1992 Resolution which commissioned the World Bank, also mirrored by DHS design of RFID systems involving overseas companies, mergers or other foreigners, (*such as MorphUSATrust/Idemia, Advent, Papillon Russian Military Surveillance Dept working with Safran of France, recently migrated also to the involvement of Ali Ababa, and other Islamic and Chinese companies*), to monitor the activation RFID codes on the driver's license, that is unacceptable national or international security concern after the traumas we American suffered on 9/11.

Whereas: the peace dove universal digital chip, already appearing on some states driver licenses, (such as Massachusettes,) and it's scheduled monitoring source and processes and location on the card design, must be fully understood by the American public and voted upon, rather than imposed by possible and probable foreign entities. The congress and executive branch owe it to the American people they represent to fully inform them in universal media press releases and other, to know the origins and consequences of the institution of these REAL ID driver licenses.

Whereas: the aesthetic design layout of the Federal ID on some driver licenses (*such as the sample of those in the state of MA*), violates normal graphic design, by ignoring the obvious empty space at the bottom of the card, and instead places the peace dove chip in a cluttered format at the ID Picture forehead parallel is questionable and violates the religious liberty of many who would protest a mark on the forehead in lieu of Biblical warnings and sensibilities of our founding forefathers.

Whereas; to carry this UN-ENCRYPTED RFID or REAL ID card in the plains of the Gulf War, on the person of our military, would also endanger them, by allowing these overseas monitoring companies of

the card code, to access their rank, serial number, social security number, weapons expertise, health history, marital status, registered gun information, banking information, criminal records and more, the utilization of that information that could lead to involvement of enemy drone activity over our battalions, is unacceptable,

Whereas; the UN-ENCRYPTED status of the REAL ID driver license, will allow a hacking nightmare, unless the current issues are resolved and encrypted,

We deem the current release of this REAL ID Driver Card technology, and its monitoring systems to be yet unresolved, and premature and possibly injurious to the American public, therefore begging further investigation, revoke and delay until such time that the public is fully informed and the issues are fully satisfactorily resolved by a commission that not only involves DHS but Congress as well.

Be it resolved that we would agree that: We must stop UNCONSTITUTIONAL installation of Federal Driver License in Oct 1st, 2020. We must pull the REAL ID ACT, and its installation back to committee and investigate its implementation and monitoring systems.

We must avoid any action of national security proposals that ever should seek to destroy approximately 300 yrs of liberty to freely access all government buildings & processes therein to govern ourselves for which we pay taxes to maintain, to anyone who does not qualify or is not able to comply with the current requirements of REAL ID driver license renewal or application. Not since the Tea Party of our Patriot Forefathers ,who overthrew the tyranny taxes & restraints of King George, have we Free Americans ever again lost those liberties, thus gained in the revolution that ensued: of free access to all government buildings, for which we pay taxes, to access the processes therein. Such free access of those government facilities and of its public transportation, would be removed from persons without a REAL ID RFID Federal Driver License (upon a false ruse of protecting such from terrorist, of which proof of frequency or current occurrence of such previous activity does not warrant such extreme broad restrictions in a non-emergency state of this union).

THEREFORE: We the Senate of the United States of America, in agreement jointly with the Senate and the President of the United States, do hereby abolish the Real ID Act of May 11, 2005 and the Federal Driver's License issue deadline for 2020 and all future un-encrypted cards of that nature that would be deemed to violate our Constitutional liberties and rights.
