

## Capabilities Statement for CPF Coaching LLC

At CPF Coaching LLC, we go beyond individual coaching to offer comprehensive business advisory and security consulting services. This includes strategic planning, risk management, and implementing effective cybersecurity measures tailored to your business needs. We aim to protect your organization against emerging threats and are well-positioned to thrive in an increasingly digital landscape.

### Our Services

- **Virtual Cybersecurity Advisory, Consulting, and Coaching Services** to help improve and mature your information security and compliance processes.
  - o **Risk Assessments** – Assessments of organization risk posture compared to reputable enterprise and risk frameworks (like NIST CSF, CMMC, ISO, HITRUST, and other control frameworks)
  - o **Security Posture Management** – Assessments of the organization's security posture using external signals.
  - o **Security Program Development and Management** – Guidance on developing and managing an organizational security program, including assets (data, hardware, software), identity, vulnerability and patch management, and software development life cycle.
- **Information Technology Advisory and Consulting services** to help improve business enablement in the use of the right technology, process, or software for your business.
  - o **Digital Transformations** – enabling your business through the use of cloud services (IaaS, PaaS, SaaS) and safe enablement through guardrails and programs to protect your data and sensitive information while keeping it available for when you need it most.
  - o **Partnered Collaborations** – Partnered collaborations with Managed Service Providers (MSPs), Managed Security Service Providers (MSSPs), Value Added Resellers (VAR), and others to help bring in the right resources for your organization.

### Commitment to Success
