

Serve More Parties — Without Adding Headcount

Adri, the AI-powered mediator from [Dyspute.ai](https://dyspute.ai), helps mediation providers resolve more disputes and reduce backlogs. Adri asynchronously guides each case from intake to resolution, while you keep full oversight.

BUILT FOR ALL MEDIATION PROVIDERS

 **ADR Providers**

 **Solo Mediators**

 **Consumer-Availability Organizations**

 **Community Mediation Centers**

AVAILABLE 24/7

**You Invite the Parties**

Your organization invites each party to the mediation with a secure, personalized invitation link.

**Adri Guides Intake**

Each party shares their side with Adri privately. Adri then prepares summaries for each party to approve and share.

**Parties Vote on Proposals**

Adri generates settlement proposals for both sides to accept or reject. Parties can also make direct offers.

**Case is Resolved**

When both sides agree on a proposal, the dispute is resolved, with an optional settlement agreement.

HUMAN OVERSIGHT AT EVERY STEP

**Get involved when it matters.** Choose which disputes go to Adri and monitor each case in real time. Decide if, when, and how to step in. Track insights and results from your case management dashboard.

**Expand Capacity**

Handle more cases with the team you already have.

**Always Available**

Parties engage 24/7, on their own schedules.

**Affordable**

Flat-fee, low-cost pricing versus traditional mediation.

**Neutral & Consistent**

Every party goes through the same impartial process.

**Full Visibility**

Track every case stage with a clear audit trail.

**Parties Stay in Control**

Nothing is binding unless both sides agree.

TRUST-FIRST PRACTICES

Data isn't used to train AI. We access AI models through APIs that prohibit model training.

Parties never interact directly. Adri filters out abusive language before anything is shared.

Ethics-first. Adri is instructed on ICODR, ABA/AAA, JAMS, and NACM ethical standards.

Confidential by design. Only proposal votes, approved summaries, and shared documents reach the other side.

Security-first practices. Aligned with ISO 27001 and the NIST AI Risk Management Framework.

Mediation privilege protected. Our platform is designed to maintain mediation confidentiality and privilege.
