

Advanced Armour
by **SWAARM®**

swaarmglobal.com

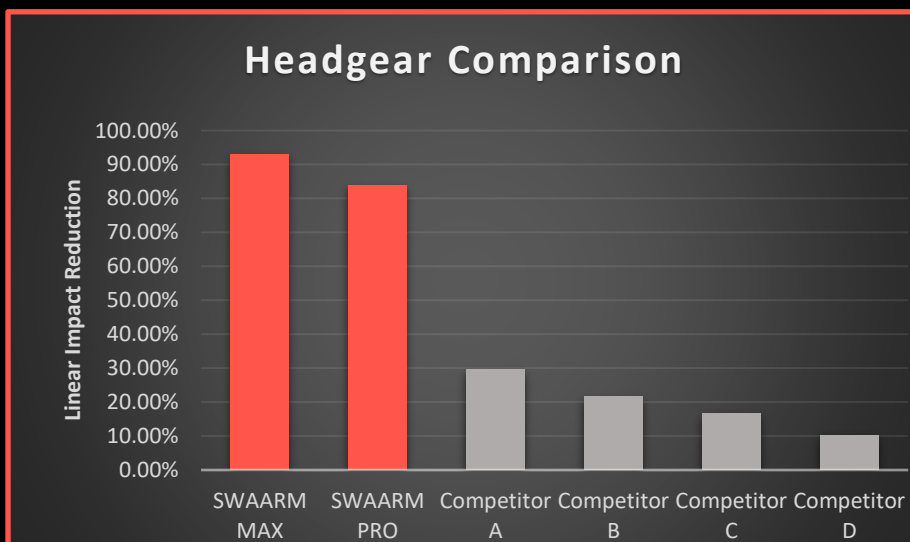

Designed by Engineers, Tested by Athletes, Proven by Science.

SWAARM 'Advanced Armour' patented technology works to reduce linear and rotational acceleration, both known risk factors contributing to injury, concussion and possible Chronic Traumatic Encephalopathy (CTE).

SWAARM utilises the expertise of engineers, doctors, professors and top athletes to develop a truly unique and effective solution to reduce impact force and help prevent injury.

SWAARM Headgear has been engineered with two protection level options: the MAX (ultimate protection), and the PRO (20% lighter).

Reduce the Force, Reduce the Impact, Prevent the Injury.

SWAARM Headgear has been independently and scientifically tested and verified by Virginia Tech in the USA, the world-leading research university on collision products.
