

Product Offering / Line Card

Task Oil and Gas Supply and Partners with an ASME 'U' and 'R' stamp accredited production facility located in Tomball, Texas, and with primary focus geared towards the oil and natural gas pipeline industry. Included within our product offering are:

Quick opening closures:

Series A, swing bolt closures, available in sizes 4" to 60" diameter and for pressure applications up to 450 psig.

Series G3, clamp ring style closure, available in sizes 4" to 48" diameter and suitable for pressure applications up to 5000 psig.

Strainers:

Series C, Temporary / witches hat strainers

Series CR, Compressor strainers

Series S, In-Line basket strainers

Series SH, Hi-Flow strainer

Series T, T-Type strainer

Series Y, Y-Type strainer

Series D, Duplex basket strainer

Filters:

Dry gas cartridge filter

Bag filter housing

Scraper / Pig traps;

Series P, Pipeline Pig Trap available as skid or free standing design

Automated Spherical Pig Launcher mechanism

Series PPLT Automated pig system for foam & mandrel pigs

Series PDV Pig diverter valve

General fabrication:

ASME Code & non-Code fabricated pressure vessels to client drawings

Skid & structural components/Meter Tubes

Air eliminator vessels

In-Line / Static Mixers

LACT receiver / sample pot vessels

Nitrogen pots

Water Knockouts

General products:

Line / Spectacle Blinds, Bleed Rings Isolation gaskets

Pig signaler

U-Bolts with Delrin Pad, Nuts and Washers

Valves and Actuation:

Brand:

KF, Calvary, Bonney Forge, KITZ, GWC, Velan, Neway, Crane, Apollo, Fortune Fusion, Vogt, Vitas, Delta

Actuation: Rotork, Bettis

Ball Valves: 2-42" ANSI 150-1500 .003" ENP and Full 316 SST Trim

Slab Gates: 3" – 36" ANSI 150, 300 and 600

Expanding Gates Valves: 3-36" ANSI 150, 300 and 600

DBB Expanding Plug Valves: 2-24" ANSI 150, 300 and 600

Swing Check Valves: 2-36" ANSI 600

Piston Check Valves: 1-24" ANSI 600

Lubricated Plug Valves: 2-12" ANSI 600

Actuators for Valve: 2-42"

Fiberglass Buildings:

Task Oil and Gas Supply Representing Shelter Works

Applications: SCADA, LACTS, MCC, Metering Stations, Odorizer Buildings, Wellheads, Gas Storage, Power Generation and

Features

Molded surfaces with encapsulated core materials

Maintenance-free design

50+ year lifespan w/25yr limited warranty

Lightweight design

Corrosion Resistant

Impact Resistant

Energy Efficient

UV Resistant

Exclusive Fiber Beam™ Construction

Easy to Install

Non-Conductive

Field Erectable

Custom, Flexible Designs

Benefits

Improves strength, longevity, structural integrity and energy efficiency

Lowest lifetime cost of ownership

Confidence and peace of mind

Shrinks construction costs such as freight and crane costs

Will not corrode, rot, rust, or decay

Can absorb impact without damage

Lowers energy costs

Minimizes fading and chalking on exterior surfaces

Ultra-Strong--Pound for pound stronger than steel!

Cuts construction and labor costs

Reduces grounding requirements

Allows freedom to build on site in hard-to-reach locations

4'-16' wide up to 40' long

OPTIONS AVAILABLE:

- Custom Sizes & Colors
- Insulation Value up to R-21
- Skids, Bases & Floors
- Containment Floors
- Molded Openings
- Partition Walls & Knock Outs
- Sound Attenuation
- Mounting Reinforcements
- Single, Double, Sliding or Roll-Up Doors
- Awnings
- Panic, 2-point or 3-point Door Hardware
- Electrical Packages
- Lighting
- Vents, Windows & Skylights
- HVAC Packages
