What this Means:

In New York State, both the Senate and Assembly must pass a bill before the Governor can consider it for signature (approval) or veto (rejection). A10728 is an identical version of S2759 in the Assembly. Experienced observers know that a bill with a “same as” in the alternate house is an important early sign that a bill could pass both the Senate and Assembly. It indicates that individual lawmakers in each house are supportive of the bill.

What Happens Next:

The committee may amend the bill to satisfy concerns of committee members, leave it as is, or refer it to another committee for further deliberation. The bill may be reported to the full Senate chamber for consideration if a majority share of the committee members support it. If a bill has not been addressed by the committee by the end of the two-year legislative term, the bill is said to have 'died in committee'.
