The Higgs Mini Murf
Color – Obsidian Black
Retail - \$2,195.00

40-50 Mile Range *

The Mini Murf is an electric mini bike for adults or kids featuring a 15 Amp Hour battery. That means you'll get roughly 40-50 miles per charge.

* Rider weight and terrain are a factor.

52 Volt Battery

A 52V battery is able to deliver the same amount of power using less current, this means you'll get awesome power from your electric mini bike while generating less heat in the motor and controller. A higher voltage also allows you to get more range out of your electric fat bike before you notice any decrease in power.

25 MPH *

If you've got a need for speed the Mini Murf will deliver. We've equipped the Mini e bike with the same motor, controller, and battery as our bigger bikes - They're quick! Regardless of which battery you choose you'll reach speeds of 25 MPH.

* Depending on rider weight.

Note: Pricing & availability are subject to change depending upon when orders are received.
All gifting events will require 50% down when placing order.

The Izzy Step-Thru
Color – Obsidian Black
Retail - \$2,195.00

35-50 Mile Range

Our high quality Samsung cell batteries will get you between 35-50 real-world miles per charge. This depends on rider weight, terrain, and riding style.

20 MPH

You'll reach a top speed of 20 mph using throttle only.
If you pedal with the motor you'll go faster.

The Pax Step-Thru

High-quality components and an easy entry step-thru frame make this Murf EVO step-through bike a hit with shorter riders. With 5 levels of pedal assist, you can dial in the perfect amount of power for your riding style. Feel like taking it easy? Our unique step through electric bike with throttle can use full-electric mode and let the 500-watt motor and 52-volt battery do all the work.

Note: Pricing & availability are subject to change depending upon when orders are received.
