The first Alabama Coastal BirdFest was a great success. The four day festival featured guided birding tours along the 240 mile long Alabama Coastal Birding Trail, evening socials with guest speakers, and a free BirdFest Expo for new birders and children.

Registrants come from 16 different states, and all of the different events were full. It was good for ecotourism, good for education, good for the environment, and good for the birds.

Thanks to generous donations from sponsors and profits from registration fees, merchandise sales, and a silent auction, the BirdFest had approximately $47,000 in profits which will be used in various ways to purchase stopover habitat for migrating birds.

The next Alabama Coastal BirdFest is planned for October 20-23, 2005. As details develop, information will be available at 251-929-0922 and on the BirdFest website at www.alabamacoastalbirdfest.com.

A picture’s worth a thousand words, so come along...

Not a bad total number of species considering the numerous fall birds that had not yet arrived and the summer birds that had already departed.
On Tuesday, October 19, The National Audubon Society released the “The State of the Birds”, a report documenting the health and abundance of North America’s birds. Appearing in the October issue of Audubon Magazine, “The State of the Birds” paints a disturbing picture. Almost 30% of America’s bird species are in “significant decline,” a situation that signals seriously degraded environmental conditions in the habitats these birds call home.

The bottom line: the state of the birds in 2004 is not sound. In particular, a disturbing 70 percent of grassland species; 36 percent of shrub-land bird species; 25 percent of forest bird species; 13 percent of wetland species; and 23 percent of bird species in urban areas are showing “statistically significant declines.”

According to “State of the Birds,” these declines are abnormal. Not part of the natural, cyclical rise and fall of bird populations, “statistically significant declines” are due to outside factors such as loss of native grasslands, overgrazing, development of wetlands, bad forest management, invasive species, pollution, and poor land use decisions.

Audubon’s President John Flicker sees a clear message in this report. “Like the canary in the coal mine warning the miner of danger ahead, our birds are an indicator of environmental and human health,” he said. “Birds signal that we are at risk next.”

But, Flicker also sees a clear path out of trouble. “People may have created these problems, but people can solve them, if we act now,” he stated. To that end, Audubon is now addressing the findings of “State of the Birds” in its conservation agenda at the legislative and policy making level, and in the states where the greatest conservation challenges exist.

Compiled by Audubon Scientist Greg Butcher, “State of the Birds” analysis makes the case for private and public action. Based on the report’s findings, Audubon is advocating for improved grassland, forest, and wetland protectin, stronger pullution controls, partnerships with private landowners, and backyard habitat programs for homeowners.

“State of the Birds” summarizes the status of nearly 700 birds species native to the continental United States, focusing on the condition of species in each of five habitat types: grasslands, shrublands, forests, wetlands, and urban areas (the fastest growing habitat type in the U.S.). Written using USGS Breeding Bird Survey and Audubon’s WatchList - cross-referenced with Audubon’s Christmas Bird Count data, the report will be issued on a yearly basis, and will inform Audubon’s conservation agenda, identifying key areas requiring immediate action.

Birds not only serve as reliable indicators of environmental conditions, they also contribute greatly to the U.S. economy. Keeping birds - and their home habitats - in good condition is not only a good conservation policy, it is also good business. The worth of birds beyond their aesthetic and conservation value is something that is beginning to be more fully appreciated, a situation that has created allies for bird conservation in small and large business, and local governments - entities that have been historically unlikely conservation partners.

“According to the U.S. Forest Service, 70 million Americans - one-third of all adults in this country - call themselves birdwatchers. The U.S. Fish & Wildlife Service notes that they contribute at least $32 billion in retail sales, $85 billion in overall economic output, and $13 billion in state and federal taxes, creating 863,406 jobs,” continued Flicker. “Birds also contribute to the bottom line in more subtle ways, providing free pest and weed control, distributing seeds, and pollinating flowers and crops. American businesses and communities simply cannot afford to ignore the state of the birds.”

A digest of the report was published in the October issue of Audubon magazine and a further analysis is available on the Audubon website, www.audubon.org/bird/stateofthebirds.
Calendar

November
9 Board Meeting, 6:30 pm
General Meeting 7:00 pm
Nature video “Audubon Society’s Video Guide to Birds of North America III” (61 minutes)
Faulkner State Community College, Fairhope Campus, Centennial Hall. Bring a friend. For more information, contact John Borom at 990-0423.

3 Sponsored by The Coastal Birding Association: Baldwin County for winter hummingbirds. Meet at 8:00 am at the Spanish Fort Overlook (northwest corner of I-10 and Hwy 98). [for info: Bill Summerour, (251) 945-3188]

20 Sponsored by The Coastal Birding Association: Bayou la Batre/Coden ponds and shoreline for ducks and shorebirds. Meet at 8:00 am at the Hardee's on Hwy 188 in Bayou la Batre. [for info: Mike Wilson, (251) 649-5760]

December
14 Annual Christmas Party 7:30—The program will be John and Bev Winn’s trip to Poland at the Government Street Baptist church in Mobile. Bring your favorite finger food and a friend. We will share food and fellowship around the “waissal bowl”.

Happy Thanksgiving
Welcome to the Mobile Bay Audubon Society, the local chapter of the National Audubon Society. We thank you for your support. A few facts about our chapter: Monthly meetings are held on the 2nd Tuesday from September thru May at 7:30 PM alternately in Fairhope and Mobile (See calendar for details of programs and locations.) Programs of interest are planned for each meeting and field trips are scheduled regularly. We are a non-profit organization—all donations are tax deductible. A list of officers is listed in the newsletter; feel free to call any of them for information. Join us as often as you can—we want to get to know you.

Ottilie Halstead, Membership Chairman

Film Week

January 24-28, 2005

There will be two night showings of the film, *An Alaskan Autumn.*

Tuesday, 7:30 pm, January 25, Faulkner Community College, Fairhope and Thursday, 7:30 pm, Government Street Baptist Church, 3401 Government Blvd, intersection I-65 and Government Blvd.

Tom Sterling, artist, photographer and award winning naturalist, will narrate his film, *An Alaskan Autumn* in 10 public and private schools during the week of January 24-28, 2005, and at two night showings for the public. Tom forsakes the hurried pace of most Alaska films. Instead, we stop, sit down and absorb the essence of Alaska—her wildness. We’ll visit bird rookeries on coastal islands, watch a grizzly family preparing for winter, brown bears praying, swimming and capturing chum salmon. Striking fall and winter scenery are a backdrop for rutting bull moose, caribou and a wolf taking a dall sheep. Foxes, parka squirrels, ptarmigan, pike marmots and beaver play intriguing roles in this feast for the senses.

Come see and enjoy, *An Alaska Autumn* at one of the night showings.
Mobile Bay Audubon Wants You!
Join Us Today!

Every membership supports Audubon’s vital efforts to protect birds, wildlife and natural habitats. As a member, you’ll become an important part of our dynamic chapter and receive a host of benefits including:

♦ A 1-year subscription (6 bi-monthly issues) of our chapter newsletter.
♦ Automatic membership in National Audubon Society, and a 1-year subscription (4 issues, one per quarter) of Audubon, its award-winning magazine;
♦ Admission to Audubon Centers across the country
♦ A 10% discount on products at select Audubon Nature Stores, and more!

Yes! I want to join Mobile Bay Audubon and National Audubon Society!
