

# Maker86 Ready to Play Compatible Track Accessories

*Up the excitement of the Ready-to-Play train sets with the Maker86 track accessories compatible with the Lionel\* Ready-To-Play train sets. If going in a circle with the occasional switch track is not enough to keep you engaged with the Lionel\* Ready-To-Play train set, these accessories are for you.*

## Assembly Details...

These parts are designed for 3D printing and resin casting, along with quality and long lasting features. Parts will have a little more resistance the first few times they are assembled. This is normal as the connection is a very high detail area and we have made these pieces more resistant to breaking from the stock track parts. No tools required for assembly.

## Testing...

All parts are inspected and fit tested with original and aftermarket track prior to packaging and shipping.

\* Maker86 Industries has no affiliation with Lionel. We are offering an aftermarket solution to their products.
