

## COLOURED SEALER RANGE

Transform the look of your  
new or existing concrete

Prime Exposure Coloured and Clear Sealers are made using the finest polymers and blended in Australia using Australian products. This ensures our quality control and processes are second to none.

Our colour sealers have been formulated to provide a highly durable coating that is UV stabilised and can be applied to most cement based surfaces.

Our Prime Exposure technical support team are all professional concrete contractors who each have over 20 years experience. We are more than happy to assist in any way and have solutions for any situation.

Not only will Prime Coloured Sealers enhance the look of your concrete, it will protect your concrete against mould, staining, algae and moss.

Prime Sealers effectively repel dirt, grime and oils. Prime Anti Slip can be added to provide a safe anti-slip system so you will never have to worry about slipping or losing your footing.

The printed colours shown are the closest representation the printing process allows. Please visit your local stockist to view our sample board.
