

Peptide Therapy				
Peptide Group	Peptides	Primary Action	Typical Duration (individually set for each patient by the medical team)	Price in Euros/Vial
Immune Support	Thymosin Alpha-1 (5mg vial)	Immune modulation, T-cell function	min 3 months max 6 months	250 €
	Thymosin Beta-4 / TB-500 (5mg vial)	TB-4: Tissue repair, anti-inflammatory	min 2 months - 5 months max	295 €
	BPC-157 (indirect)	BPC-157: Gut & tissue healing, anti-inflammatory	1 month - 6 months	295 €
Energy Enhancement	Mots-C (5mg vial)	Mots-C: Mitochondrial function	6- 12 months	185 €
	Package: GH Secretagogues (CJC 1295 DAC, Ipamorelin, GHRP-6, Sermorelin, Tesamorelin)	GH Secretagogues: Increase GH/IGF-1 axis for muscle/fat metabolism, recovery, & energy	3 months min - 6 months max	1.500 €
	Sermorelin 5mg vial	increases growth hormone	6 months	325 €
	IPAMORELLIN 5mg	IGF-1 axis for muscles	5 months	375 €
	GHRP-6 5mg vial	fat metabolism and energy	6 months	250 €
	CJC 1295 DAC 5mg vial	recovery and energy	1 year	250 €
	IGF-1 LR3 (1mg vial)	for diabetic people / insulin resistance	4–6 weeks	350 €
Metabolism Boosters	AOD 9604 (5mg vial)	AOD 9604: Fragment of HGH, lipolytic effect	6months - 1 year	185 €
	Semaglutide (5mg vials)	Semaglutide: GLP-1 agonist for appetite/glucose regulation	2 years	395 €
	Tirzepatide (5mg vial)	Tirzepatide: Dual GIP/GLP-1 agonist for weight loss, glycemic control	3 months minimum	295 €
	Tesamorelin (5mg vial)	Tesamorelin: Reduces visceral fat; GHRH analog	6 months or shorter	395 €
	Amlexanox (40 mg caps)	Amlexanox: Possible insulin sensitizer, weight reduction in studies (no injection, only capsules)	3 months minimum - 6 months	130 €
	HCG 5000iu vial	HCG (controversial): Some use in low-calorie “HCG diet” fertility peptide	6 months (results are faster in men 2mo)	175 €
