

ZX-Speed IR 3D Tool Setting Probe

Tool Measurement

Infrared Transmission

Multidirectional

Wear-free Measuring Mechanism

Tool Breakage Detection

Tool Length Measurement

Tool Radius Measurement

Axes Compensation

3D Tool Setting Probe ZX-Speed IR

BLUM
focus on productivity

ZX-Speed IR | 3D Tool Setting Probe | Tactile tool setting system with infrared transmission

Wireless 3D tool setting probe for precise tool measurement

- Tool breakage detection
- Tool length measurement
- Tool radius measurement
- Axes compensation

Your benefit:

- Reliable measurement with a wide range of tool types and sizes
- Superior precision due to latest measuring mechanism technology
- No subsequent damage due to tool breakage
- Fast ROI
- Use of two measuring systems with one IR receiver
- Extended battery life
- Compact and robust design

Optoelectronic measuring mechanism

- Skip signal is generated via shading of an interior miniature light barrier
- Wear-free signal generation
- Enables higher measuring speeds and accuracy than with conventional probes

Technical data

Protection class	IP68
Approach direction	$\pm X, \pm Y, -Z$
Messkraft in XY Z	1.6 N 5.2 N
Max. deflection in XY Z	$\pm 11^\circ$ 6 mm
Repeatability	0.4 μm 2 σ
Max. probing speed	2 m/min
Min. tool diameter	1 mm *
Mass	280 g
Signal transmission Range	Infrared $\pm 60^\circ$ in Z, 360° in X/Y
Battery (2 pieces)	Saft Lithium LS14250 (1/2 AA, 3.6 V) 1200 mAh

* Depending on geometry and material of tool. Probing force must not result in damage of tool

Tool length measurement

Tool radius measurement

Sequential use of two measuring systems with one infrared receiver

Optional nozzle for tool cleaning

Blum worldwide Service & Support
