

IN FOCUS

Important updates for the provider community

Spotlight on Dermatology

As we head into May and the warmer months, we turn our focus to Dermatology. Our broad network of dermatology practices are available to provide services across the care spectrum, from skin cancer screenings to Mohs surgery and complex skin diseases.

This month we have clinical updates from three of our dermatology colleagues:

- Dr. David Greenstein, Northeast Dermatology Associates: [updates on atopic dermatitis](#)
- Dr. Rachel Reynolds, Department of Dermatology at BIDMC: [updates in supportive oncodermatology, complex medical dermatology, and hidradenitis suppurative \(HS\) and psoriasis](#)
- Dr. Eric Xu, Associates in Dermatology in Watertown: [updates on acne, psoriasis, eczema, and hair loss](#)

This is for informational purposes only, and should not be considered medical advice. We would encourage you to reach out to your Physician Performance or BILHPN dermatologist for further guidance on these topics.

To better inform our primary care physicians of the dermatology services available to them within the Beth Israel Lahey Performance Network, we have asked each of our Dermatology practices to identify their scope of services as well as their appointment availability.

The chart below lists in alphabetical order the dermatology practices that are members of Physician Performance, along with a summary of services provided. Click [here](#) to see all dermatologists in the BILHPN network. If you need assistance finding a dermatology provider for a particular patient, please reach out to us and we can connect you to the appropriate referral management contact.
