National Cancer Prevention Month

Remember to wear purple February 4th for World Cancer Day!

World Cancer Day

Created in 2000, World Cancer Day has grown into a positive movement for everyone, everywhere to unite, face and address cancer and cancer care.

Talking with your patients is a good way to inform and encourage them on its prevention, early detection, and treatment. It can significantly improve chances of survival.

Recognizing challenges that patients can experience with cancer care is important:

- Inequity in cancer care costs lives.
- People who seek cancer care hit barriers at every turn.
- Income, education, location and discrimination based on ethnicity, gender, sexual orientation, age, disability and lifestyle are just a few of the factors that can negatively affect care.
- The gap affects everyone, including you and your loved ones.
