Important updates for the provider community

Spotlight on Men's Health/Urology

June is Men's Health Awareness month. Screening for conditions like prostate cancer, heart disease and diabetes can reduce incidence and mortality through early detection and treatment. It is also important to have open conversations and provide support for men's mental well-being. Please reference the [BILHPN provider directory](#) when looking for physicians to care for your

patients and ensure that they are receiving excellent care for any patient care services needed.

Dr. Evan Appelbaum shared some thoughts on [optimizing testosterone replacement therapy](#) for patients with hypogonadism. This is for informational purposes only, and this should not be considered medical advice. We would encourage you to reach out to your Physician Performance or BILHPN physicians for further guidance on these topics.

To better inform our primary care physicians of the urology services available to them within the Beth Israel Lahey Performance Network, we have asked each of our urology practices to identify their scope of services as well as their appointment availability.

The chart below lists in alphabetical order the urology practices that are members of Physician Performance, along with a summary of services provided. Click [here](#) to see all urologists in the BILHPN network. If you need assistance finding a urology provider for a particular patient, please reach out to us and we can connect you to the appropriate referral management contact.
