

IN FOCUS

Important updates for the provider community

Spotlight on Orthopedics

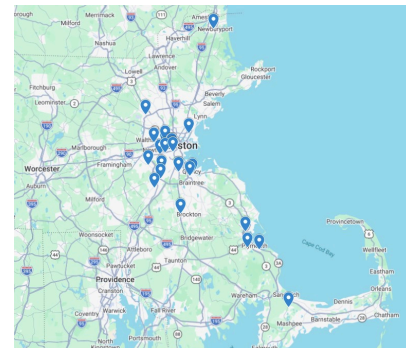

As we continue with our specialty spotlight series, this month our focus is on our Orthopedic colleagues. Our clinical updates are from Dr. Jason Pittman, HMFP Orthopedics on the **benefits of computer assisted navigation in Spine surgery** and Drs. Steven Leckie, Gregory Frechette and Casey Kuripla, Plymouth Bay Orthopedic Associates on **recent advances in spine**

surgery, hand surgery and foot and ankle care.

This is for informational purposes only, and this should not be considered medical advice. We would encourage you to reach out to Physician Performance or BILHPN orthopedic surgeon for further guidance on these topics.

To better inform our primary care physicians of the orthopedic services available to them within the Beth Israel Lahey Performance Network, we have asked each of our Orthopedic practices to identify their scopes and services as well as their appointment availability.

Click on this [link](#) to see a map of the locations of our Physician Performance orthopedic practices. You can hover over the markers to see practice names, addresses and phone numbers.

The chart below outlines orthopedic practices that are members of Physician Performance, along with a summary of services provided. Click [here](#) to see all orthopedics in the BILHPN network. If you need assistance finding an orthopedic provider for a particular patient, please reach out to us and we can connect you to the appropriate referral management contact.
