Recent history shows that some of the most outstanding companies, even if they were, once upon a time, purpose-driven organizations, can fall into a trap as they dissipate their soul by overtly focusing on transactional ways without due attention to its core purpose — as values and heritage are referenced in the past tense and less frequently in everyday business decisions and dilemmas in the C-Suite and boardrooms. Such forces subvert the soul of an organization. *The L&S®* engagement sets out a vantage point and opens a new conversation to mitigate this silent peril.
