A. RESPONSIBILITY POLICY

1. Each Membership account is required to register a single Voting Member for the Entity. The Voting Member must have an ownership affiliation with a lot within LLPOA. There is only one Voting Member per Entity. The Voting Member is responsible for updating the office with changes to the account and submission of Association votes. Entities who fail to register a Voting Member will be assigned one by the Board of Trustees with the information on file for the Entity.
2. Property Owners must bear the ultimate responsibility for violations of Lake Lorelei rules incurred by members of the family, guest, owner and owner's renters (Resolution 1971-5, August 6, 1971, Resolution 1994 – 1 August 5, 1994). Therefore, the responsibility for the payment of fines is with the property owner. The property owner is liable for the payment of any fine levied against a family member, guest, himself or renter. Failure to pay a fine within the prescribed time will result in the property owner being deemed "not in good standing".
3. Renters must bear responsibility for violations of the Lake Lorelei rules incurred by member of the family, guest and himself. Therefore, the responsibility for the payment of fines is with the renter. The renter is liable for the payment of any fine levied against a family member guest or himself. Failure to pay a fine within the prescribed time will result in both the property owner and the renter being deemed "not in good standing".
4. Contractors must bear the responsibility for violations of the Lake Lorelei rules incurred by his employees, subcontractors and their employees and himself. The contractor is liable for payment of fines incurred by the aforementioned. Building permits will be withheld or stop work orders will be issued by the Board of Trustees and entrance to The Lake Lorelei subdivision will be denied as long as such fines remain unpaid.
5. Venders, suppliers and other persons conducting business in the Lake Lorelei subdivision are responsible for fines incurred by them and their employees and entrance to the Lake Lorelei subdivision will be denied as long as such fines remain unpaid.

B. ENFORCEMENT POLICY

A fine/citation or warning may be issued by the Board of Trustees and sent by first class mail to the violator. Fined/cited parties may appeal by advising the Board, in writing, within 15 days of the fine/citation that they intend to appeal. Each and every day such violation continues after the 15 day appeal period expires (or after the appeal is heard and acted upon) may be deemed a separate offense. The Executive Committee will adjudicate all appeals. Violators will be notified of the disposition in writing. If the fine/citation is upheld, the violator has 15 days to pay or otherwise comply with the decision. Fines not paid within fifteen (15) days will result in the member being deemed a member "not in good standing". LLPOA shall be entitled to recover its

attorneys' fees and court costs in any proceeding (arbitration, lawsuit, etc.) related to any fine/citation or to enforce any provision or term of any governing document (including but not limited to these rules, LLPOA's Code of Regulation/Amended By-Laws, and its restrictive Covenants).

F. LAKE LORELEI VALVE OPERATIONS

(Resolution 2000-06) – note that the following is the general procedure that had been practiced starting in 1968.

Preamble

Whereas, the purpose of annual opening of the drain valve of the dam is to lower the water level of the lake to:

- Protect the shoreline seawalls from ice damage
- Discharge the dead vegetation ash at the dam
- Protect the dock and boat launch ramp from ice damage (to as depth of 4 feet)
- Reduce pressure from face of dam
- Aerate the lake bottom of the perimeter of the lake
- Minimize the weed growth at the perimeter by the change from aquatic growth.

The procedure to manage the winter lake level is:

Open the main valve initially 30 turns of the valve shaft (60 turns of the handle), then adjusting within 3 days to accomplish lowering the water level (under no precipitation conditions) at the maximum rate of 2" per day. Faster only if required to attain desired pool by December 15th. Valve is to be operated no more often than once per week to adjust for precipitation. A permanent written and dated and signed log is to be maintained in a conspicuous place in the association office. Valve is to be opened November 15th and closed February 15th, if there is no ice on the surface. **(Revised January 2023)**

Through the period that the valve is open, the water level shall be in the draining mode to maintain a water level between 59" and 70" below normal overflow level (Revised December 2016, Revised May 2017, Revised January 2022)

Technical note: 30 turns of the shaft positions the valve in the 1/2 open position. Opening more than 60 turns of the shaft damages the valve. Two turns of the wrench handle - turns the shaft one turn.
