

Just Keep Swimming

In the movie Finding Nemo Dory, a fish that suffers from hereditary memory loss repeats her catch phrase “just keep swimming just keep swimming.” reminding herself what to do when she gets down. With the current state of events many people find that they are getting down. They do not remember what to do when times are hard this to is possibly a hereditary memory loss. For generations people have forgot who to turn to when times are hard or who to thank when times are good.

Jeremiah 2:32

“ Dose a young woman forget her jewelry?
Dose a bride hide her wedding dress?
Yet for years on end my people have forgotten me”

For Dory the thing that sustains her happiness is to” Just Keep Swimming”. Dory found the remedy to prevent the past from repeating it’s self. For Gods people we have forgotten who is the author of life. Life rarely is perfect and often will still our joy. We have forgot God in all of this in order to combat hereditary memory loss we should be reminded “Just keep praying, Just keep praying”
