

Mike Foxworth's *Just in Time* is an eloquent blend of memoir, medical odyssey, and generational reflection that offers readers both a deeply personal and universally inspiring story. At its core, this book chronicles the author's extraordinary journey from teenage printer's apprentice in Florida to seasoned nonprofit healthcare professional; finally, a resilient survivor of mantle cell lymphoma (MCL). Told through a lens that is both reflective and informative, *Just in Time* is as much a celebration of life as it is a tribute to the unsung heroes in healthcare.

What makes this work truly unique is its layered structure and rich variety of themes. From the early chapters recounting Foxworth's formative years in the hot-metal days of Linotype printing to his transition into "cold type" and digital media, the story captures a professional evolution that mirrors the shift in American printing and publishing history. These reflections are not mere nostalgia; they lay the groundwork for understanding the endurance and adaptability that would later define his fight with cancer.

The heart of the book, however, lies in its detailed, honest, and sometimes harrowing account of Foxworth's battle with MCL, an aggressive form of non-Hodgkin lymphoma. His diagnosis in 2006 marked the beginning of an intense medical saga involving chemotherapy, relapse, and ultimately, a life-saving allogeneic stem cell transplant from a donor in Germany. What elevates this narrative beyond a typical cancer memoir is Foxworth's sharp focus on the human connections that sustained him—family, faith, skilled physicians, and even anonymous nurses whose roles were pivotal though unseen.

Spirituality weaves gently throughout the story, never as dogma but as affirmation. Biblical and numerological reflections on the number "77," which marks his age in 2025 and symbolizes personal and spiritual completeness, add depth and philosophical weight to the narrative. Equally compelling are the "Letters of Hope" included toward the end of the book. These messages, written for those newly diagnosed with cancer, resonate with empathy and authenticity, offering not just comfort, but courage. The inclusion of timelines, historical medical context, and personal letters makes this a hybrid book that is part memoir, part resource manual, and part inspirational journal.

Foxworth's writing is thoughtful, precise, and tinged with gratitude. His voice is one of wisdom earned through adversity. The addendum and references to **Flipboard** archives, online blogs, and modern digital publishing platforms showcase his continued engagement in storytelling, education, and encouragement for others walking similar paths.

In summary, *Just in Time* is a powerful testament to survival, legacy, and the enduring value of story. Whether you are a cancer survivor, caregiver, Boomer reflecting on life's journey, or simply someone seeking encouragement in the face of challenge, this book delivers. Foxworth doesn't just tell a story—he invites us to see the connections that make life meaningful.
