Welcome

Rants & Raves

It's that time of year again. It finally cooled off a little, it's finally raining, and a little taste of Fall is in the air. Fall is usually one of my favorite times of the year, and this year is really no exception. It's just that this year it is more of an escape, or at least a reprieve from a summer that would be better off forgotten. Like most of you, we have been hot and dry. We are just now receiving our first rain of over an inch since late June. To say the least it makes it tough on every one in our business, including the cattle. When you combine that with the craziest increase of operating expenses in my memory, it makes it really tough to dig out a profit.

Even with those things in mind, I know that the vast majority of us will find a way and a means to continue to feed and cloth this nation and much of the world. Ranchers and farmers just seem to ranch and farm until they can't. Then someone else takes up the cause and goes again.

Cattle people are a special group. We have the unique ability in the agricultural sector to cut and stretch costs in ways that crop farmers, and even other sectors of animal agriculture can't. We can feed a little less or a little more to fit our needs, our resources or the market. We can feed hay, crop waste and byproducts, or commodity feeds that other species cannot utilize. No other segment of agriculture really has those options and even though many of our ungrateful consumers won't admit it, no other segment is that efficient, environmentally friendly or sustainable.

We, along with other parts of animal agriculture are for the most part considered an annoying sideshow by most of the USDA. We certainly don't receive near the attention that the crop sector garners, especially in trying times. I think that is certainly part of what has made us such an independent, in you face and up you ass group of people. For that I am grateful, because I truly believe we are stronger because of it.

All that said, as an industry we have to utilize the tools we have, to survive. That survival still boils down to the same set of basic strategies. Make sound business decisions. Utilize your available resources in a wise and timely manner. Promote the best efficient use of you time, your resources and your money. Use the best and most efficient genetics you can afford and market the product of those genetics in the best way you can. Last but certainly not least, set aside time for yourself, your family, your community, your friends and your God, because in the end those are the only things that you will have left.

I think you will find genetics available in this sale that will help you meet those objectives. Bulls that are productive and affordable. Females that are bred to produce and take your herd to the next level. Cattle that not only move the industry in the right direction, but your bottom line in the right direction as well. People you can trust, count on to help, and that will always try to do the right thing.

As always everyone here at Green Springs want to offer our help in any way we can to expedite your efforts to find and purchase the cattle you need. We are here to help. All you need to do is ask.

Hope to see you sale day.

The Green Springs Crew,

Kent, Kathy, Cole, Travis, Brady, and TJ

Schedule for Accepting Weaned Bulls for the GSBT Efficiency & Performance Test

Early Summer Test - Bulls born Aug 15-Oct 31 - Must arrive by June 1, 2023

Late Summer Test - Bulls born Nov 1- Dec. 31- Must arrive by July 1, 2023

Early Fall Test - Bulls born Jan 1- Feb 28 - Must arrive by Oct 1, 2023

Late Fall Test - Bulls born Mar 1 - May 31 - Must arrive by Dec. 1, 2023

General Information

Announcements made the day of the sale take precedence over the printed catalog.

Bidding: Can be done in person at the auction or via the internet at www.LiveAuctions.TV. If you are unable to attend the sale and want to purchase bulls, please call Kent at 417-448-7416 to assist you in making your selections. Call prior to the sale to describe the type & breed of bull (bulls) you want and let him know your price range (s). You pay only the bid price, just as if you were bidding in person. Every effort will be made to purchase the bull (bulls) of your choice at your designated price or less. We will call you after the sale to confirm your purchase (s) and confirm your method of payment and plan of trucking or hauling. A hassle free buying experience.

Breeding Guarantee: All bulls selling in this sale have passed a thorough and stringent BSE (Breeding Soundness Evaluation) by Dr. Erik Andersen of 54 Vet Clinic, Nevada, Mo. Each bull selling has passed and is considered a satisfactory potential breeder. All bulls are guaranteed as breeding bulls through the first breeding season from the date of purchase. Please keep in mind that we expect the bull (s) to be managed with proper animal husbandry practices. They are young bulls and require some additional management compared to mature bulls. Proper management should include the following: 12-15 month old bulls at time of sale are utilized in a ratio of one bull to no more than 15 cows and 16-20 month old bulls, one bull to no more than 20 cows. Furthermore, if these requirements are not adhered to or these bulls are placed in service or are housed until time of service with mature bulls then consignor of record at time of sale will not stand behind this breeding guarantee. If a problem does arise please contact GSBT, Kent Abele, 417-448-7416, who will in turn notify the owner of record at the time of sale. The problem will be evaluated & consultation with a veterinarian done if needed. If replacement is required, a bull of equal quality will be given. If a replacement bull is not available a credit will be issued to be used in a future GSBT Bull Sale. Shipping an animal you feel is unsatisfactory before contacting GSBT will void the breeding guarantee.

Bull Development Program/Maintenance After the Sale: If you are not ready for the bulls at sale time GSBT can maintain & develop the bulls at the test station for a period of time until you are ready for them. A nominal fee of \$4.00 per day will be charged plus any veterinarian charges incurred. Bulls will be maintained on a growing ration in grass traps. Bulls become the buyer's responsibility immediately after the sale. GSBT nor the owners thereof or the employees thereof are not responsible for death or injury. Mortality &/or injury insurance is available from David Yackley, Creek Insurance 731-879-1380 & can be purchased at time of settlement. First breeding season insurance is also available at time of settlement if desired.

Health Certificates: A health certificate will be provided at the time of settlement which will be sufficient for transporting the bull (s) interstate or intrastate and provides the results of the most recent breeding soundness exam. Buyers who wish to take cattle into states with specific and rigid health regulations should inquire about the health tests required by their state. All bulls sold are virgin bulls and/or have been tested for trichomonosis. The young bulls, 11-15 months are virgin bulls and have not been exposed to any females. All bulls have been tested for trichomonosis. It is always sound herd management to test for breeding soundness and trichomonosis prior to placing bulls with the females at the beginning of breeding season.

Registration Certificates will be issued in the owners name. Let the settlement clerks know exactly what name you want to appear on the certificate and what address it should be mailed to. The consignor of the bull holds the responsibility of transferring ownership. Follow up with the consignor that you have purchased the bull from if you have any questions. Consignor names & contact information are listed in the front of the catalog and also with each Lot#.

Settlement & Load Out: All buyers must make settlement in the clerk's office. Cash/check/or credit cards are accepted for payment. If using a credit card a 3% convenience fee will be charged. At the time of settlement, Mortality and/or First Breeding Season Insurance can be purchased. During settlement let the clerks know if you are hauling your bull (s) home the day of sale, or picking them up at the test station in a few days, or leaving them for a short period of time to develop. Delivery can be arranged for a minimal fee. If possible settlement clerks prefer load outs after the whole auction is over. Thanks for your consideration.

A Note To Our Customers

If you are familiar with our sales over the last 23 years you may notice that the performance and particularly the IMF on this set of bulls is a little lower than sales in the past.

To a certain degree that is due to the 105 degree plus heat indexes we had for much of the summer. It is also due to the extremely high cost of feed that I am sure most of you know all too well. We removed a substantial amount of the energy (corn) from the ration on this test group in order to try to preserve some profit for our consignors.

Even though that move slightly reduced average daily gain and IMF it in no way reduces the quality of the animals. When looking at the data, look at the ratios for the trait or the GSBT index. That is the number that truly lets us find the superior animals in the group. All bulls were fed the same ration at the same time in the same environment. Thus any differences would tend to be genetic.

One Kid At A Time

When I was young there were plastic things from five cent gum machines that made us smile. Simple toys, often made from everyday things like ice cream sticks and rubber bands or stuff that lay about that had no other purpose.

When I was young, I couldn't wait to go outside, climb a tree till the first limb cracked or go down to the nearest pond and skip flat rocks, sometimes all the way across. Ponds weren't all that big back then but to me they seemed like oceans.

After a summer rain the ditches would run full, and little sticks and big imaginations would float me all the way to the Mississippi or even farther if it didn't get dark too soon or mom called me in.

On the hottest days if I was at Grandpas house, an unplanned trip to Whitfield's Station in a "67 Sedan de Ville would yield a RC Cola taken from a chest type cooler that worked like a jig saw puzzle if I had a dime. And he always seemed to have one.

I can an literally count the nights on my fingers and toes when my family, often with neighbors or extended family didn't sit down together for our evening meal. It was seldom not home cooked. We always prayed before we ate, and we always ate what was prepared...period.

When I was young, I literally lived to go with, and be like my dad. Often I did, and even more often, I was. I raked my first hay when I was eight with a 430 John Deere, and cultivated my first beans when I was ten with the same tractor and a two row front mount cultivator. I was much more excited then than I was when I graduated college.

I think I kissed my first girl (that I wasn't related to) when I was twelve. I can't even recall the details but I'm sure she was cute and even more sure I turned red in the face. I'm not sure however, if it was from embarrassment or from being slapped.

The point to all of it is this; these are the experiences that I and many of you my age had. Maybe not the same ones, but similar ones. These are the things that made us what we are and who we are. Not the "Greatest Generation", that was a title rightfully reserved for the one before us. In all honesty probably not the worst generation either.

Today we have a group of young people growing up that are as many as three or even four generations removed from an agrarian society. Most of them grew up on fast food and many of them don't even know where it came from or how it got there. Even worse, many of them don't care. Many of them live in a single parent household

Many of them have few or no responsibilities. Many of them seldom even go outside. Many of them have not been challenged or even asked to use their imagination, or their brain, or their back.

Most of them grew up with video games as their entertainment and their toys. Most of them always have a tablet or smart phone in their face, ear buds in their ears, and tick tock, face book, and twitter on their minds. Their experiences are making them what they are and who they are.

The saddest part of all this is that it's not their fault. It's ours. We must engage young people and teach them to think beyond the reach of the charger chord on their smart phone.

Find a young person, your own, your grand child, your neighbors kid, a kid from church, any kid will do. Take them with you and teach them the simple things. Teach them how it's all connected.

Check the cows. Drive a tractor. Plant and harvest a crop.

Go hunting. Teach them how to skin a rabbit.

Teach them how to cook it. Then teach them how to pray and eat it.

Give them some responsilbility.

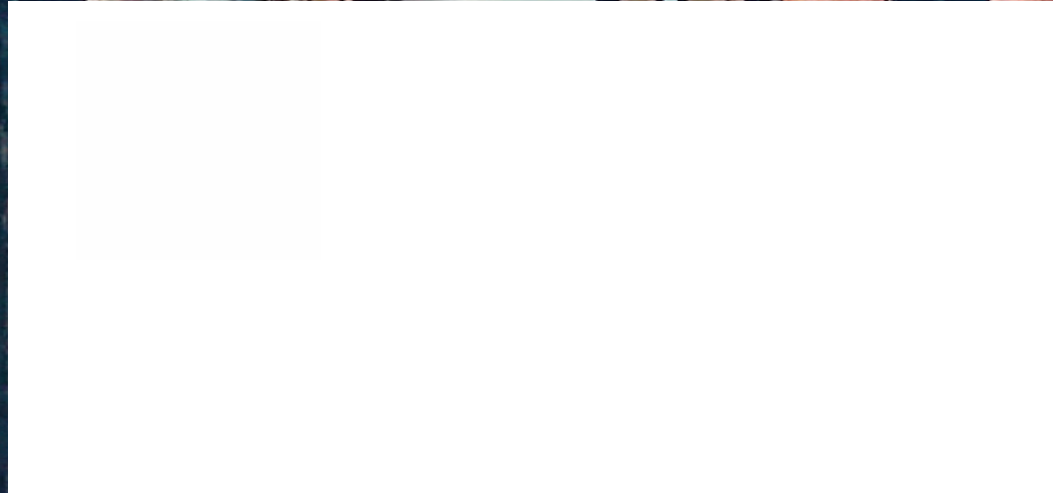

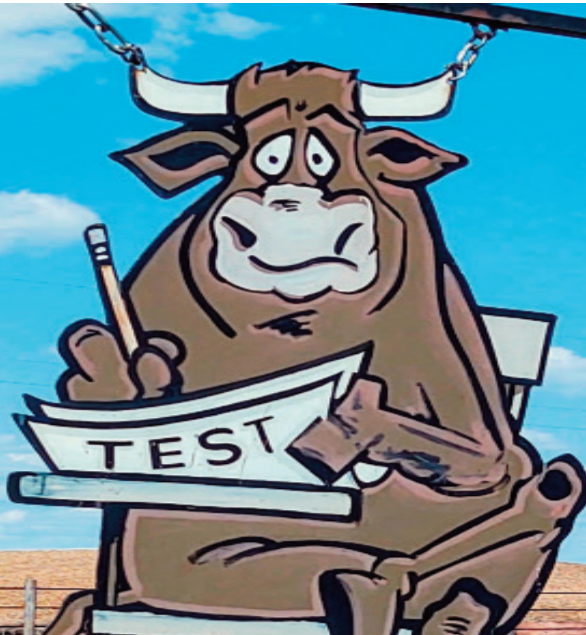

Then in some way, reward them for their effort.

In most cases I think you will find not only will they be interested and have fun, but they will want to do it again, and learn more.

We can start to fix this, one kid at a time!
