Sale Location Directions: 3 Cedars Sales Facility.24327 E Old Town Road, Nevada, Mo.  
7.8 Miles East of Nevada on Hwy 54 to 2400 Rd, turn South on gravel, go 2 miles to Old Town Rd, turn left or East, go almost 1/4 miles. Entry on North or left.

# Welcome

As I write this it is raining. That's something it hasn't done much of here in the last couple of years. I had about forgotten what it looked like. If it wasn't so cold I might go out and stand in it.

It can be depressing sometime how the hard times hurt. But it also amazes me how quickly we all bounce back when they end. "I guess" as the song says "that's just the cowboy in us all."

The bright side of it all is that cattle prices are flirting with all time highs and if it weren't for those crazy, pesky, expenses, we would all be rich. I think we are in for some more of those high prices as long as beef demand stays good and the government doesn't do something to screw it up. That concerns me a bit, because they have become pretty good at doing that.

One thing that confuses me is how grain prices have moderated somewhat but feed prices haven't. If it's in a bag and has a fancy name, it's basically unaffordable. I do not for the life of me know how anyone can expect to take a feed that costs \$600 to \$700 a ton and feed it to an animal that will convert it at a 5 or 6 to 1 rate, and do anything much more than just pay the feed bill.

With that in mind let's look at the difference between an efficient bull and an inefficient one. If Bull A has an RFI of -3.00 and Bull B has an RFI of +3.00 that means that bull A will eat 6 pounds less feed per day to gain the same amount of weight as bull B. If you are feeding Billy Bob's Extra Special Developer Ration that cost \$600 per ton that means it costs 30 cents per pound. That's \$1.80 per day difference in the feed cost of Bull A and Bull B. Over a 100 day feeding period that amounts to \$180.

Now here's where it starts to get interesting. We know that RFI is roughly 35% heritable. That means that Bull A's calves should move the efficiency needle about 2.1 lbs in his favor in a calf crop. Now if you use him spring and fall and get 40 calves a year out of him and feed those calves Billy Bob's for 100 days you could expect to save about \$3150 dollars in feed cost per year over calves sired by Bull B. Over three years of using Bull A that's over \$9000.

Even more awakening is the fact that if you keep heifers and continue to buy efficient bulls you can move the needle even farther and the benefit starts to compound itself in the cow herd. Over three or four generations of selection pressure for feed efficiency we can expect to see a 12 to 15 percent improvement in feed efficiency. So if the value of your pasture and the costs of your feed per year is roughly \$550 per production unit (which is probably on the low side) you could save roughly \$71 in feed costs per unit per year. If you are running 200 cows that is over \$14,000 per year that is left in your pocket. Not a premium that you have to count on someone to pay you, but savings that drop right to your bottom line.

One other kicker to think about is the fact that if your 200 cows are 12 to 15 percent more efficient, you can run 12 to 15% more cows, on average, on the same land you have now. That's an extra 24 to 30 head of cows. How much more money, at today's prices, would 20 to 25 extra calves put in your pocket?

There are a lot of high quality efficient bulls in this offering. The bulls in this group have quality that runs deeper than any set we have had in many moons. Find the bulls that will do the things you need to do in your cow herd then find the ones in that group that are efficient, and buy them. A good bull is worth a lot of money. A good bull that is efficient is worth more--a lot more.

As always if there is anything that we can do to help you in selection, feeding or hauling of your purchases feel free to ask. We are here to help.

**Lots 121-123A**  
 Presented by  
**Byergo Beef Genetics**

**Byergo Beef Genetics**  
 is a father-son team of Dr Rex  
 and Justin Byergo.

Rex is a veterinarian in Nevada.  
 Justin is part of the management  
 team at Smithfield's pork production  
 facilities.

They are long time friends  
 and have tested cattle at Green  
 Springs periodically over the years.  
 They have always raised top of the  
 line Angus cattle. They have  
 always had a great eye for cattle  
 and a strong focus on the road  
 ahead.

Feel free to contact them with  
 questions about their operation  
 and specifically the bulls and  
 females they are offering in this  
 sale.

# General Information

Announcements made the day of the sale take precedence over the printed catalog.

**Bidding:** Can be done in person at the auction or via the internet at [www.LiveAuctions.TV](http://www.LiveAuctions.TV). If you are unable to attend the sale and want to purchase bulls, please call Kent at 417-448-7416 to assist you in making your selections. Call prior to the sale to describe the type & breed of bull (bulls) you want and let him know your price range (s). You pay only the bid price, just as if you were bidding in person. Every effort will be made to purchase the bull (bulls) of your choice at your designated price or less. We will call you after the sale to confirm your purchase (s) and confirm your method of payment and plan of trucking or hauling. A hassle free buying experience.

**Breeding Guarantee:** All bulls selling in this sale have passed a thorough and stringent BSE (Breeding Soundness Evaluation) by Dr. Erik Andersen of 54 Vet Clinic, Nevada, Mo. Each bull selling has passed and is considered a satisfactory potential breeder. All bulls are guaranteed as breeding bulls through the first breeding season from the date of purchase. Please keep in mind that we expect the bull (s) to be managed with proper animal husbandry practices. They are young bulls and require some additional management compared to mature bulls. Proper management should include the following: 12-15 month old bulls at time of sale are utilized in a ratio of one bull to no more than 15 cows and 16-20 month old bulls, one bull to no more than 20 cows. Furthermore, if these requirements are not adhered to or these bulls are placed in service or are housed until time of service with mature bulls then consignor of record at time of sale will not stand behind this breeding guarantee. If a problem does arise please contact GSBT, Kent Abele, 417-448-7416, who will in turn notify the owner of record at the time of sale. The problem will be evaluated & consultation with a veterinarian done if needed. If replacement is required, a bull of equal quality will be given. If a replacement bull is not available a credit will be issued to be used in a future GSBT Bull Sale. Shipping an animal you feel is unsatisfactory before contacting GSBT will void the breeding guarantee.

**Bull Development Program/Maintenance After the Sale:** If you are not ready for the bulls at sale time GSBT can maintain & develop the bulls at the test station for a period of time until you are ready for them. A nominal fee of \$4.00 per day will be charged plus any veterinarian charges incurred. Bulls will be maintained on a growing ration in grass traps. Bulls become the buyer's responsibility immediately after the sale. GSBT nor the owners thereof or the employees thereof are not responsible for death or injury. Mortality &/or injury insurance is available from David Yackley, Creek Insurance 731-879-1380 & can be purchased at time of settlement. First breeding season insurance is also available at time of settlement if desired.

**Health Certificates:** A health certificate will be provided at the time of settlement which will be sufficient for transporting the bull (s) interstate or intrastate and provides the results of the most recent breeding soundness exam. Buyers who wish to take cattle into states with specific and rigid health regulations should inquire about the health tests required by their state. All bulls sold are virgin bulls and/or have been tested for trichomonosis. The young bulls, 11-15 months are virgin bulls and have not been exposed to any females. All bulls have been tested for trichomonosis. It is always sound herd management to test for breeding soundness and trichomonosis prior to placing bulls with the females at the beginning of breeding season.

**Registration Certificates** will be issued in the owners name. Let the settlement clerks know exactly what name you want to appear on the certificate and what address it should be mailed to. The consignor of the bull holds the responsibility of transferring ownership. Follow up with the consignor that you have purchased the bull from if you have any questions. Consignor names & contact information are listed in the front of the catalog and also with each Lot#.

**Settlement & Load Out:** All buyers must make settlement in the clerk's office. Cash/check/or credit cards are accepted for payment. If using a credit card a 3% convenience fee will be charged. At the time of settlement, Mortality and/or First Breeding Season Insurance can be purchased. During settlement let the clerks know if you are hauling your bull (s) home the day of sale, or picking them up at the test station in a few days, or leaving them for a short period of time to develop. Delivery can be arranged for a minimal fee. If possible settlement clerks prefer load outs after the whole auction is over. Thanks for your consideration.
