patio decking
with landscape tiles

patio decking

Strong and affordable patio decking with the look of natural stone.

Silver Creek landscape tiles are the newest material choice for patio decking. Property owners will not only enjoy the look and feel of natural stone on their raised patio, they'll never have to scrape, paint, or stain a conventional wood deck again.

Aside from creating valuable and attractive outdoor spaces, pedestal decks have many benefits. Pedestal systems can promote energy efficiency, protect membrane roofing, help reduce noise, hide drainage and electrical, and allow access to what's below.

Always consult a structural engineer for proper deck design.

caps and tops
for pillars & seat walls

Pillar and seat wall caps are wet cast reproductions of handcrafted originals.

seat wall and pillar caps

natural-look sealers help keep pavers looking like the day they were installed

wet-look sealers dramatically enhance the color and look of pavers and landscape tiles

Choose a joint sand that stands up to the damaging effects of freeze-thaw, erosion, weeds and insects.

Choose the right joint sand the first time

Your paver project represents an investment in your home and the time you spend outdoors. Erosion and the subsequent maintenance of jointing sand can similarly erode your enjoyment of your outdoor living space. Unlike other paver jointing sands, Techniseal® polymeric sand remains in place, resisting erosion caused by repeated sweeping, wind, rain and even power washing.

Eliminate grass and weeds

Weeds and grasses will take root anywhere they can, including your new patio if not sanded properly. Techniseal® polymeric sand creates an impenetrable sand joint and represents the best defense available against unwanted vegetation.

Insect protection

Without the proper protection, ants will take up residence in the spaces between pavers. Like weed prevention, Techniseal's Polymeric Sand forms an impenetrable barrier against ant and insect tunneling.

Professional grade sands, cleaners and sealers help maintain your patio, pathway or drive's beauty indefinitely.

sands, sealers and cleaners

protect
your investment

Like any decorative exterior surface, pavers and landscape tiles aren't immune to the effects of time and use.

Keep your investment clean and beautiful

BBQ grease, motor oil, suntan lotion, fertilizer granules, bird droppings, leaf stains, paint and tire marks conspire to dull the beauty of decorative pavement. Techniseal products are the optimal prevention against discoloration caused by weathering, UV rays and salt. Over time, the corrosive forces of nature can take a toll on pavers. Applying a protectant slows the march of time.

Make surfaces easier to clean

The time and effort required for regular cleaning or preparing to entertain is dramatically reduced if your pavement is protected. Sealers are the ultimate protection against oil and other stains.

Choose your look

You can choose the look of your patio, path or drive by the product used to protect its surface. A wet-look or semi-gloss sealer enhances color while matte or natural-look sealers preserve its original appearance. No matter what look you choose, sealing is the essential final step in your project.
