

VG | MEGAN MCMANUS

BUFFALO TO NEW YORK CITY

I was born and raised in Buffalo, New York with big city dreams. I attended the Fashion Institute of Technology and graduated with a BFA in Visual Presentation and Exhibition Design, an AAS in Communication Design, and a minor in Art History.

MY CAREER

Immediately upon graduating in 2018, I was hired by a small NYC design firm. At RPG, I began to design retail merchandising point of purchase displays.

Within a few months, I was presented with an opportunity to join the Marc Jacobs Global Visual Merchandising and Store Design team. At Marc Jacobs, I had hands on experience in each stage of the design process. It extended from concept and design development, to 3D modeling and renderings, to production and installation.

In 2020, when the pandemic hit, I moved back to my hometown of Buffalo, New York. I began refining my technical skill set as a Drafter at Boston Valley Terra Cotta and soon after joined Hadley Exhibits as a 3D Designer, designing trade shows and museums. This experience broadened my perspective and naturally led me into the event industry.

In 2023, I joined the Capricorn Creative team as a Conceptual Designer, where I continue to expand my knowledge and experience in corporate events and branded environments.

WHAT I CAN DELIVER

What I can deliver is an extraordinary skill set with a sense of creativity. My strength lies within the design of immersive brand experiences and the ability to bring them to life through 3D modeling, rendering, floor plans, elevations, graphics, materials, and concept boards.

I thrive in a fast-paced environment and can communicate, meet deadlines, and deliver design concepts on a consistently high-end level.

I am a passionate, hard-working team player who leads by example and is always looking for something new to learn.

CONTINUING TO EVOLVE

Throughout my career, I have continued to evolve by expanding my experience across retail, exhibits, drafting, events, and branded environments. Each opportunity has strengthened the creative and technical perspective I bring to my work.

I believe my creativity and range of skills would be a strong addition to your team. Please explore my work below, and visit megdesign.info to view additional projects. If you have any questions, feel free to contact me at any time.
