

Upstate Piping Products (UPP) is a local distributor of Shurjoint products. Shurjoint offers one of the widest ranges of piping components designed for the many industries. Products include Grooved, Threaded and Flow Control components for use in and with a variety of piping materials and in both wet and dry systems. Please contact our Sales Team for more product information or questions.

Building Services

Shurjoint is recognized for its design and manufacture of mechanical piping components. They offer an extensive amount of piping components, ranging in a variety of sizes from ½" to 96" (15mm-2400mm) in a variety of materials.

Fire Protection

The majority of a fire protection system service life is spent in a static, no-flow condition which makes it unique among all piping systems. In order to safeguard a facility, its occupants, properties inside and continued operations, proper functioning of a fire protection system is significantly critical in any emergency. Shurjoint is a well-known for its fire protections products.

Water and Waste Water

Shurjoint is likely to have the product to meet the needs of your water system. Whether a potable water, reverse osmosis, desalination, conveyance, or water treatment system, Shurjoint offers both Grooved and Ring Joint components in a variety of materials to meet your specific requirements.

Oil, Gas and Chemical

Given the advantages of mechanical piping components including design versatility, reliability and their quick and easy installation it is no wonder the industry has embraced their use. This combined with a variety of gasket elastomers to meet a wide variety of system needs and high- pressure couplings, fittings and valves designed specifically for the needs of the industry make Shurjoint the right choice.

Agriculture

Shurjoint offers some of the most advanced piping components available today for the agricultural industry featuring faster and easier installation, safety (no flame), versatility and proven reliability. Shurjoint offers Grooved, Hole-cut, Plain-end, Ring Joint, Flanged and Shoulder components for use with a variety of piping materials and service applications including: irrigation, surface / sub-surface drainage, closed conduit drainage, fertilization, waterway and more.

Industrial and Power Generation

Whether your industrial construction project involves process piping, the auto industry or the pharmaceutical industry, pulp and paper industry, hydro-electric or co-gen power generation, Shurjoint can provide the products and solutions you need.

Custom Casting

Global customers worldwide rely on Shurjoint for the manufacture and supply of quality proprietary custom castings and private label products and components. Materials include ductile iron, bronze and a variety of stainless steel grades including duplex and super duplex materials.
