Shaping the Survey

Survey Data -- Fall 2021

About the Survey

The American Academy of Pediatrics (AAP) encouraged chapters to support pediatric healthcare providers to increase the vaccination rate. The goal of this survey was to identify and support the immunization program needs of community stakeholders to help shape the parent survey.

Needs Assessment Purpose

The needs assessment examined:

- The needs of pediatric health stakeholders related to increasing routine vaccination rate in children and adolescents to inform the development of strategies, action plans, and/or resources to meet these needs, and
- Anticipated COVID-19 vaccination support needs.

Background Information

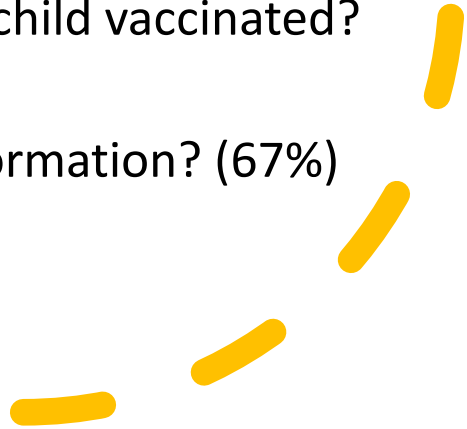

I am a/an

Experience With Similar Surveys

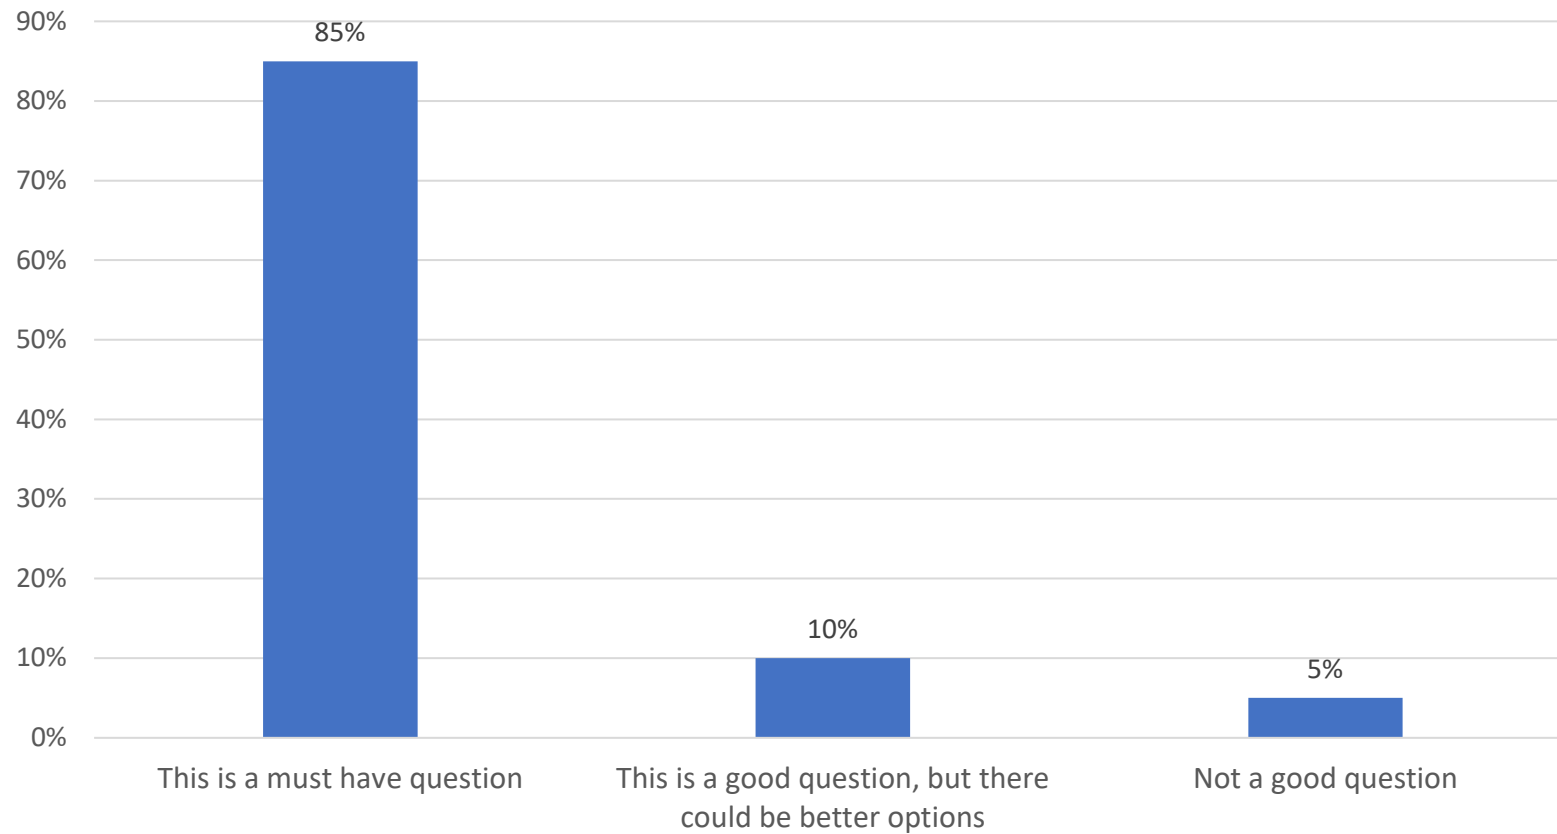

These the six most favored questions:

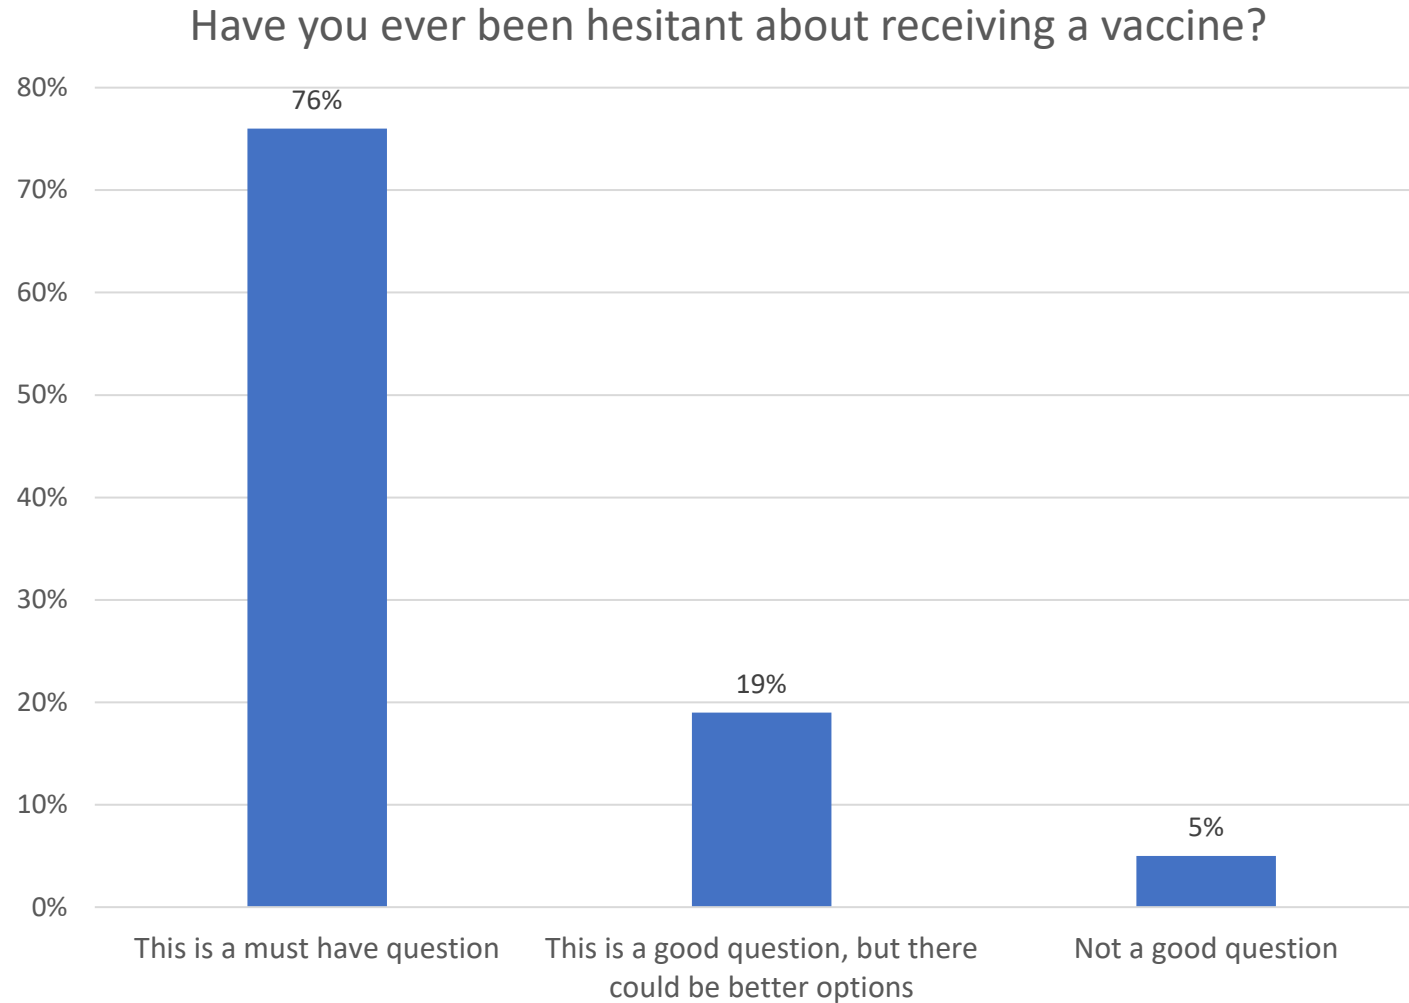

1. My health professional provides me with all the information I need to answer my questions on immunizations. (85%)
 2. Have you ever been hesitant about receiving a vaccine? (76%)
 3. Has distance, timing of clinic, or wait at clinic and/or costs into getting to clinic prevented you from getting your child immunized? (76%)
 4. Do you feel you get enough information about vaccines and their safety? (75%)
 5. Have you seen/read/heard something in social media that made you re-consider choice to have your child vaccinated? (71%)
 6. Who do you trust the most for medical information? (67%)
- 

Understanding Vaccine Information

My health professional provides me with all the information I need to answer my questions on immunizations

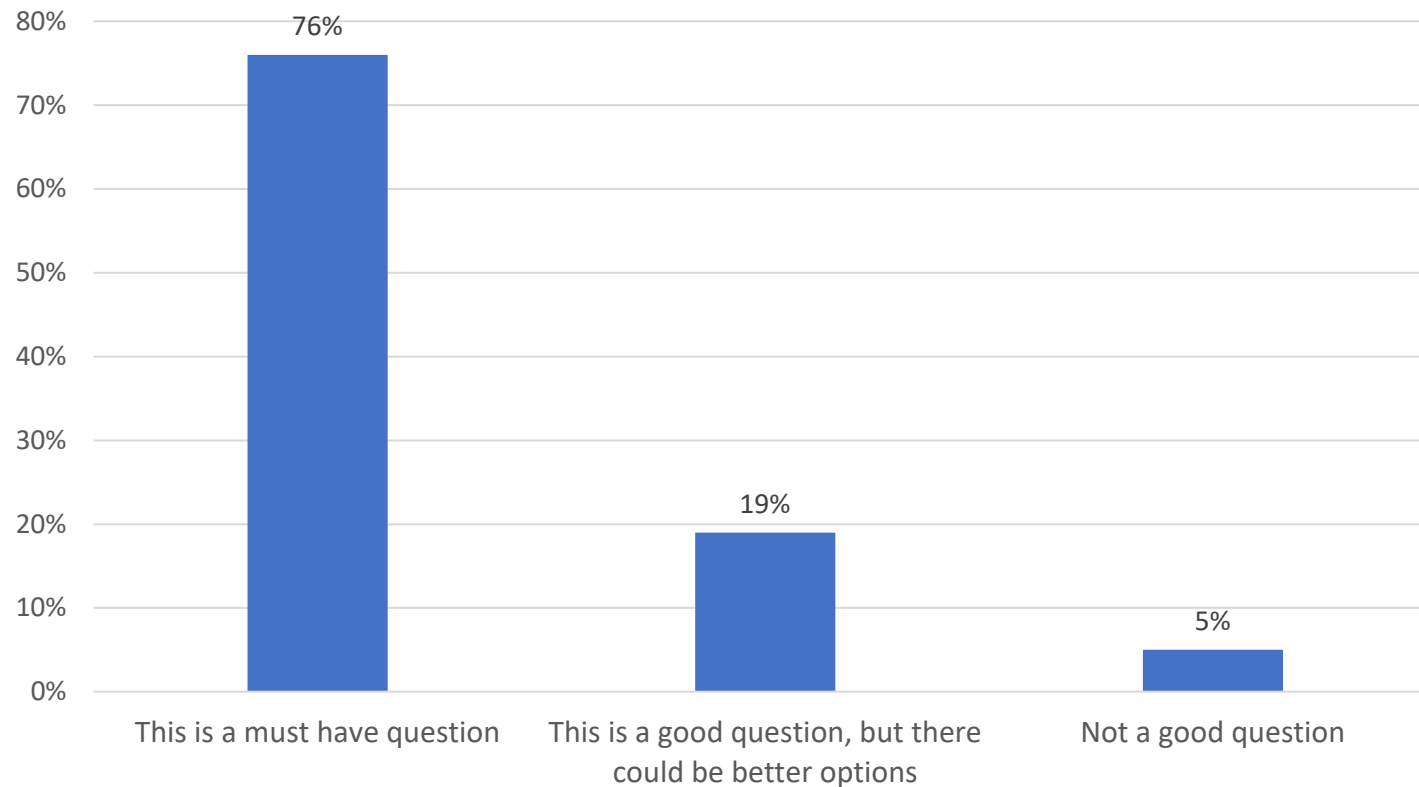

Understanding Vaccine Hesitancy

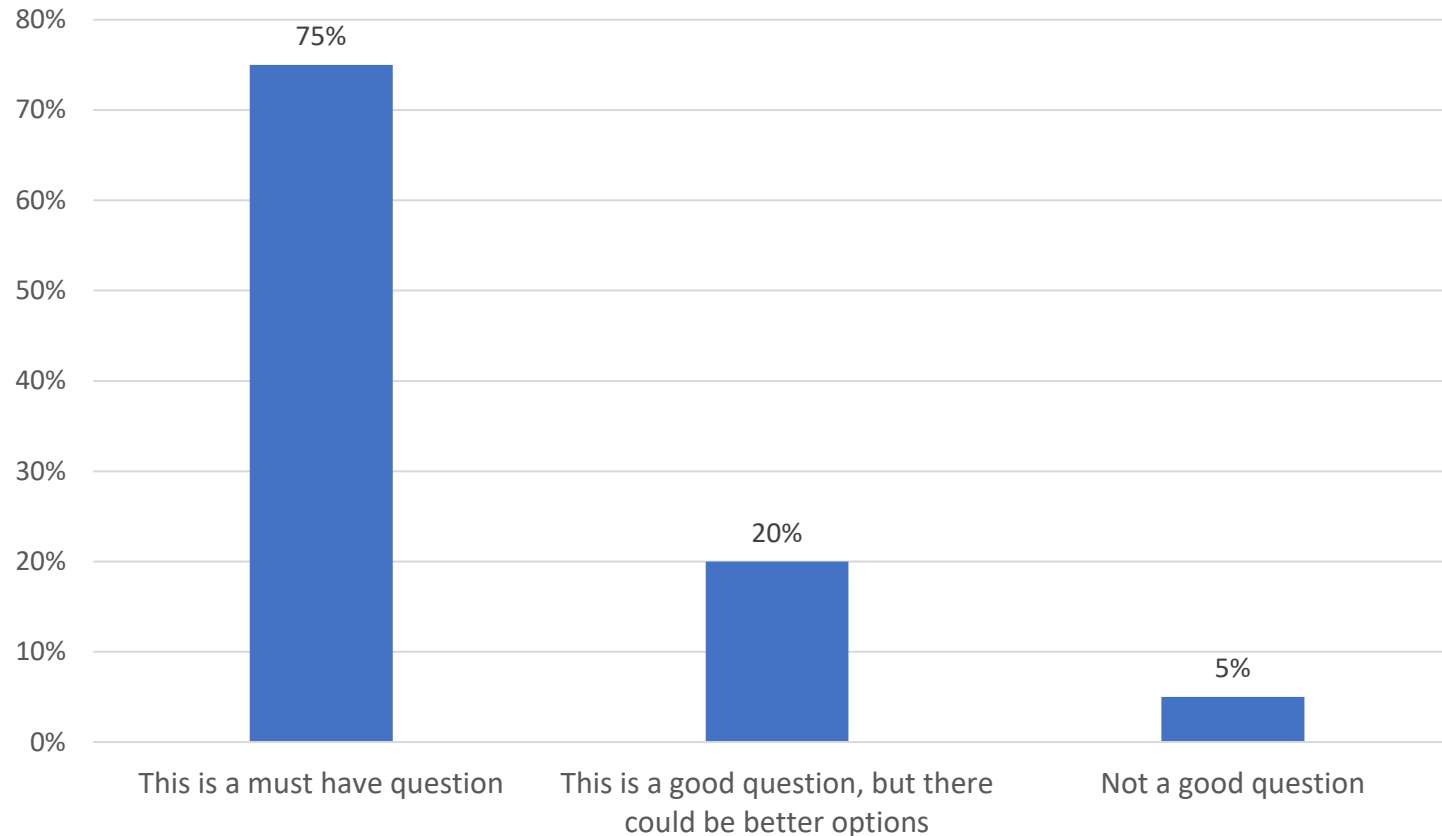

Understanding Barriers In Access To Care

Has distance, timing of clinic, or wait at clinic and/or costs in getting to clinic prevented you from getting your child immunized?

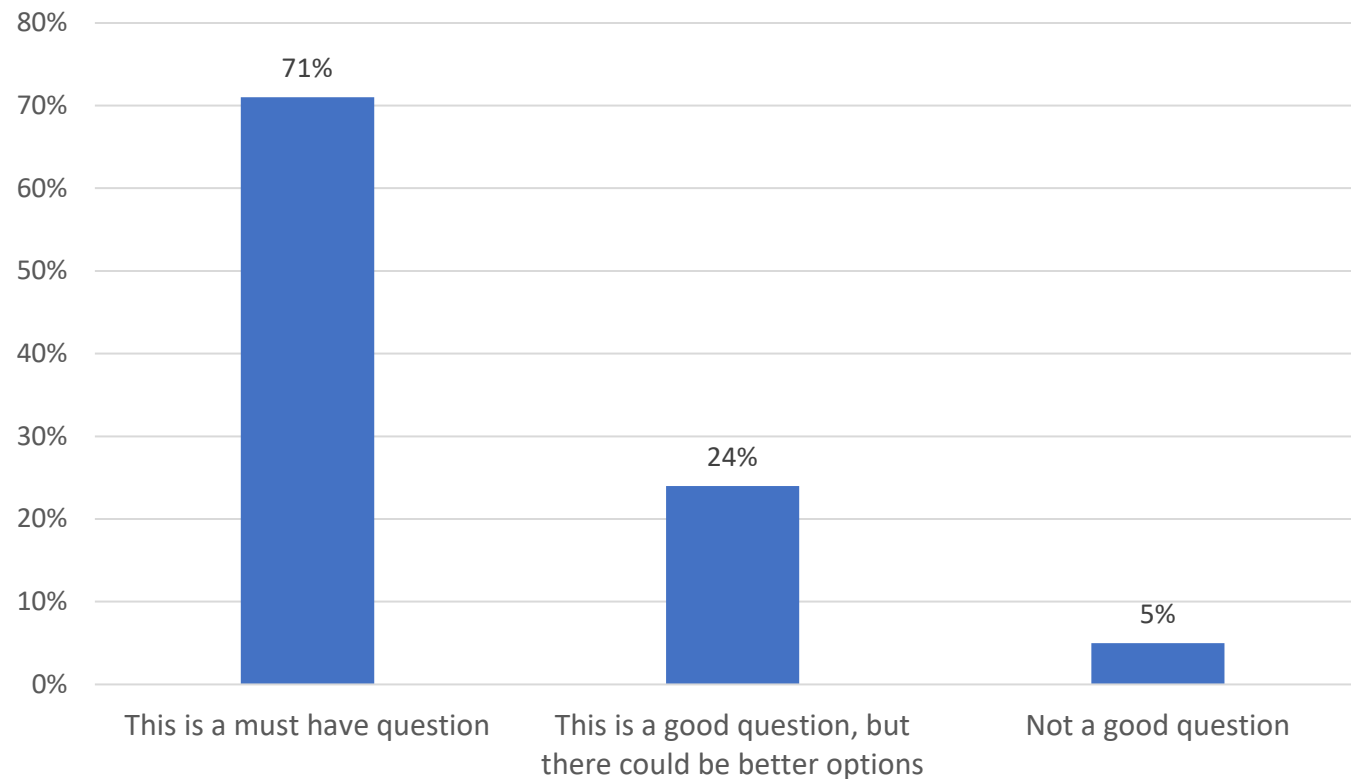

Understanding Vaccine Safety Information

Do you feel you get enough information about vaccines and their safety?

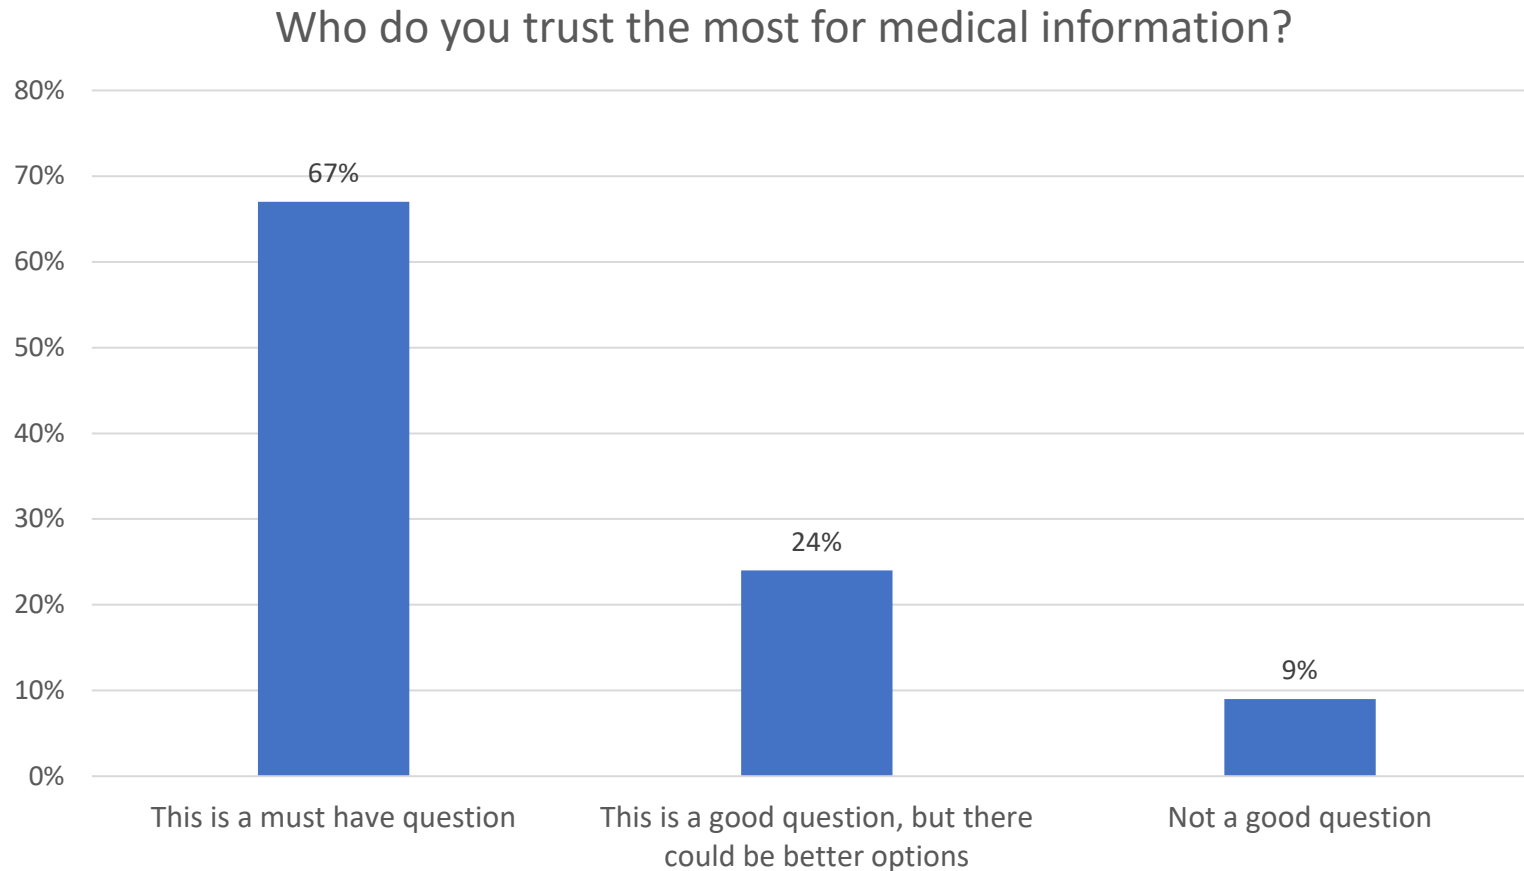

Understanding Medical Information Sources

Have you seen/heard/read something in social media that made you re-consider choice to have your child vaccinated?

Trust In Medical Information

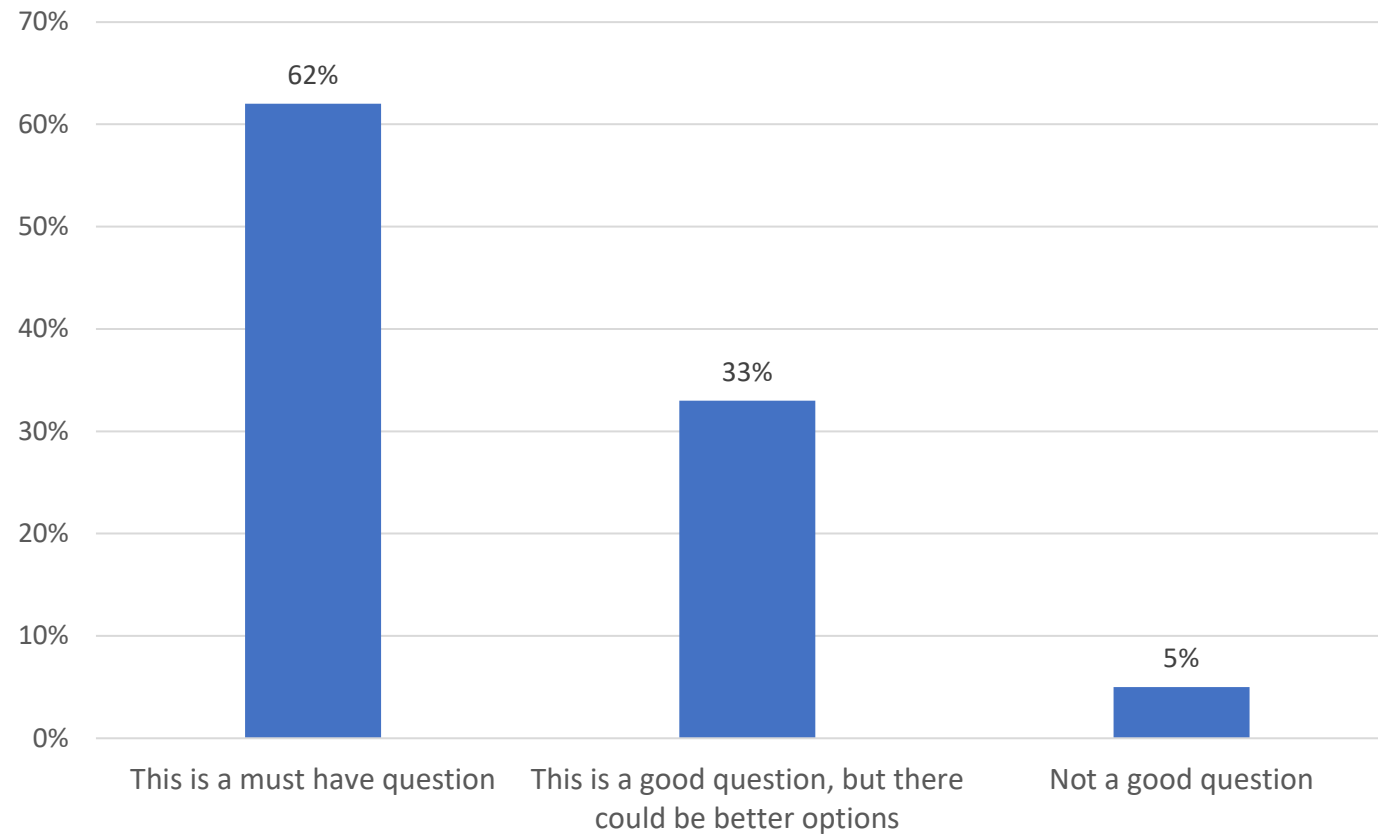

Understanding Response Analysis of Survey

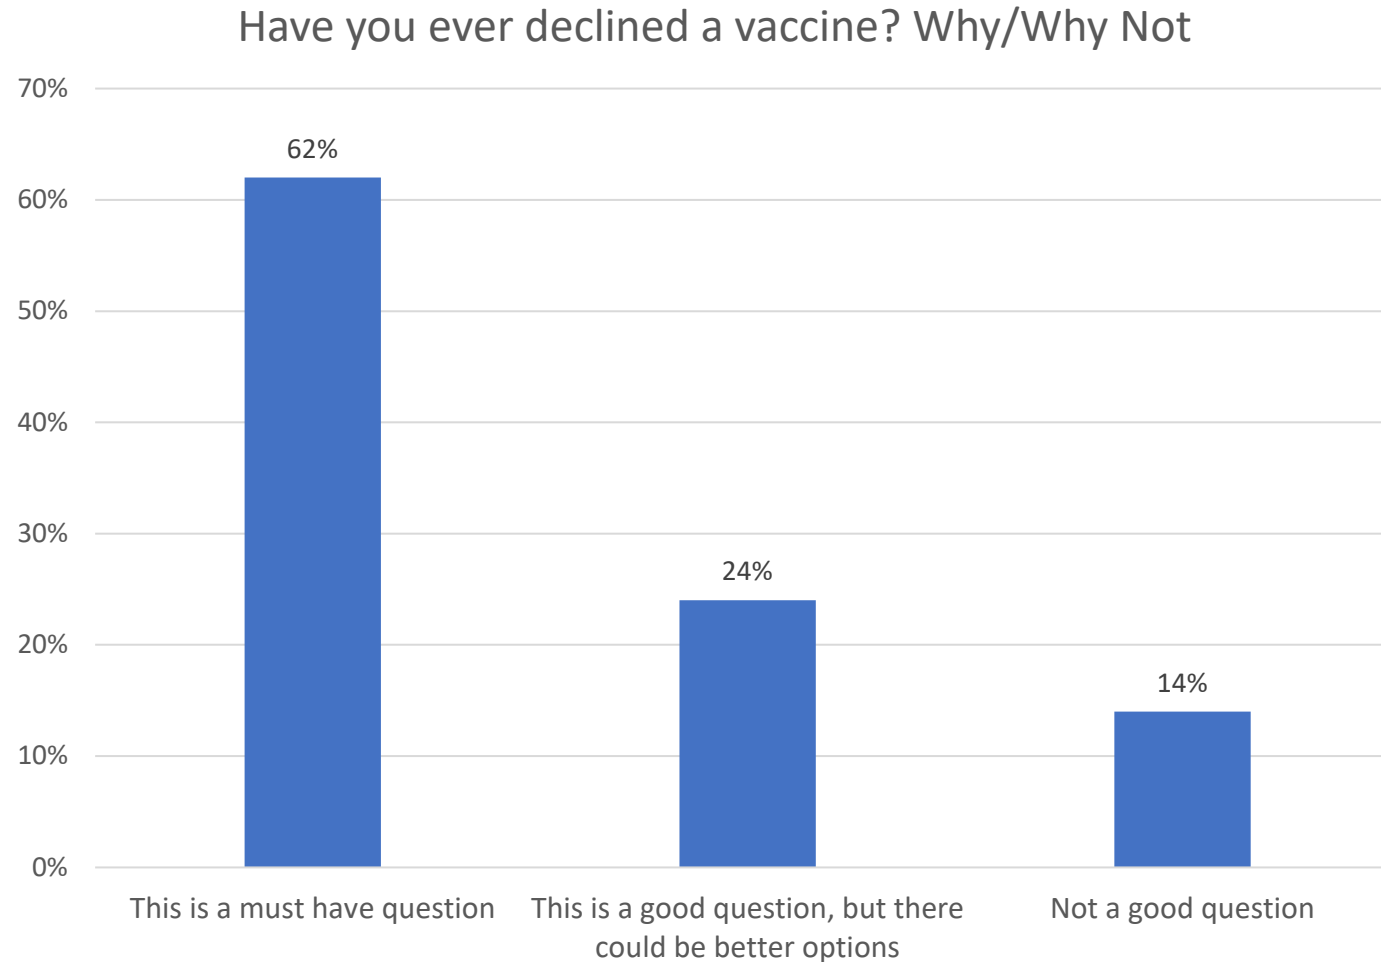

Understanding Vaccine Compliance

Has your child received their vaccines per AAP and CDC timeline?

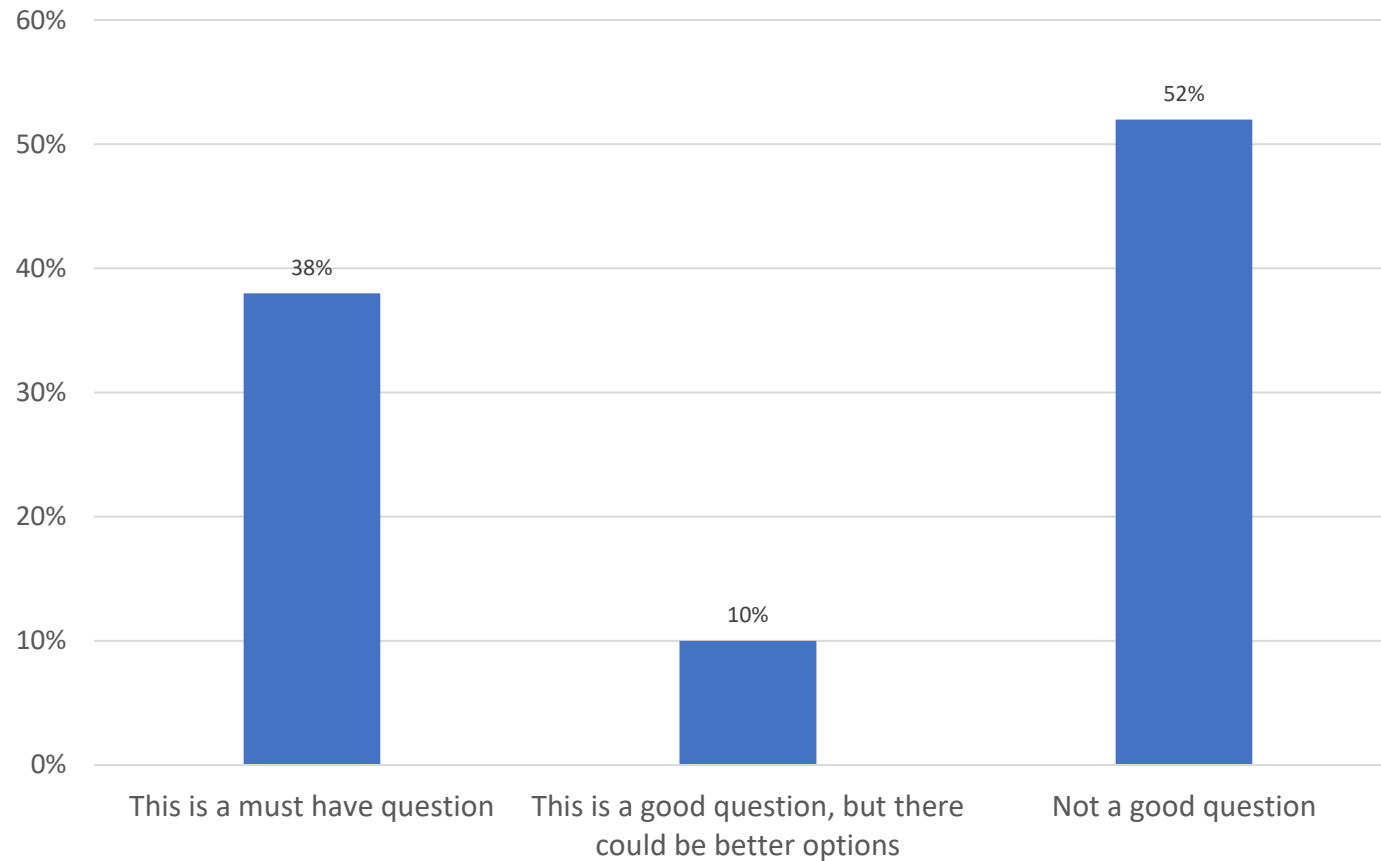

Understanding Vaccine Compliance

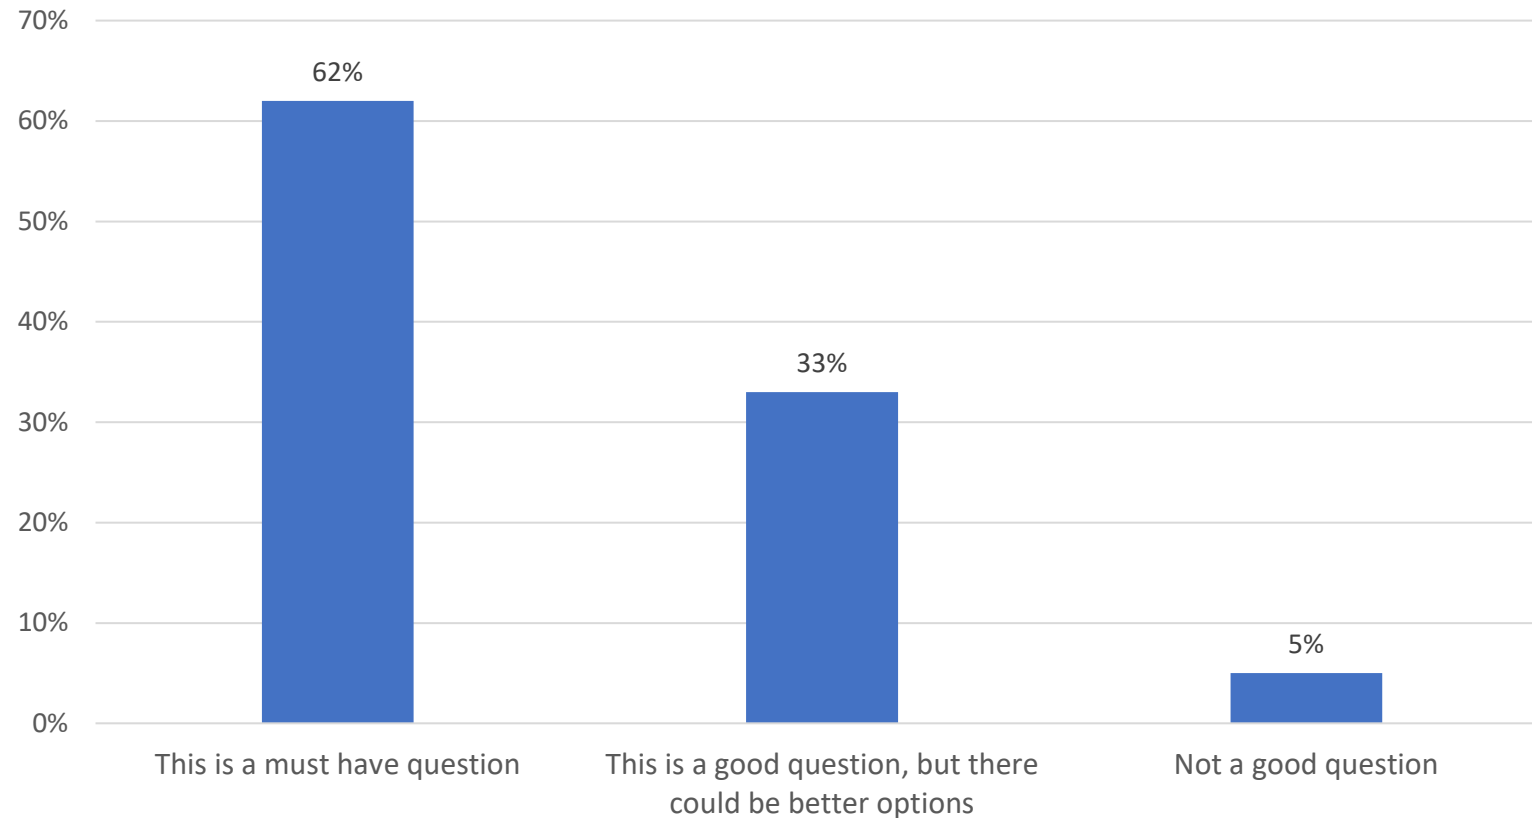

Understanding Community Needs

Has your community in the past refused to accept certain vaccines? Which vaccine(s) and why?

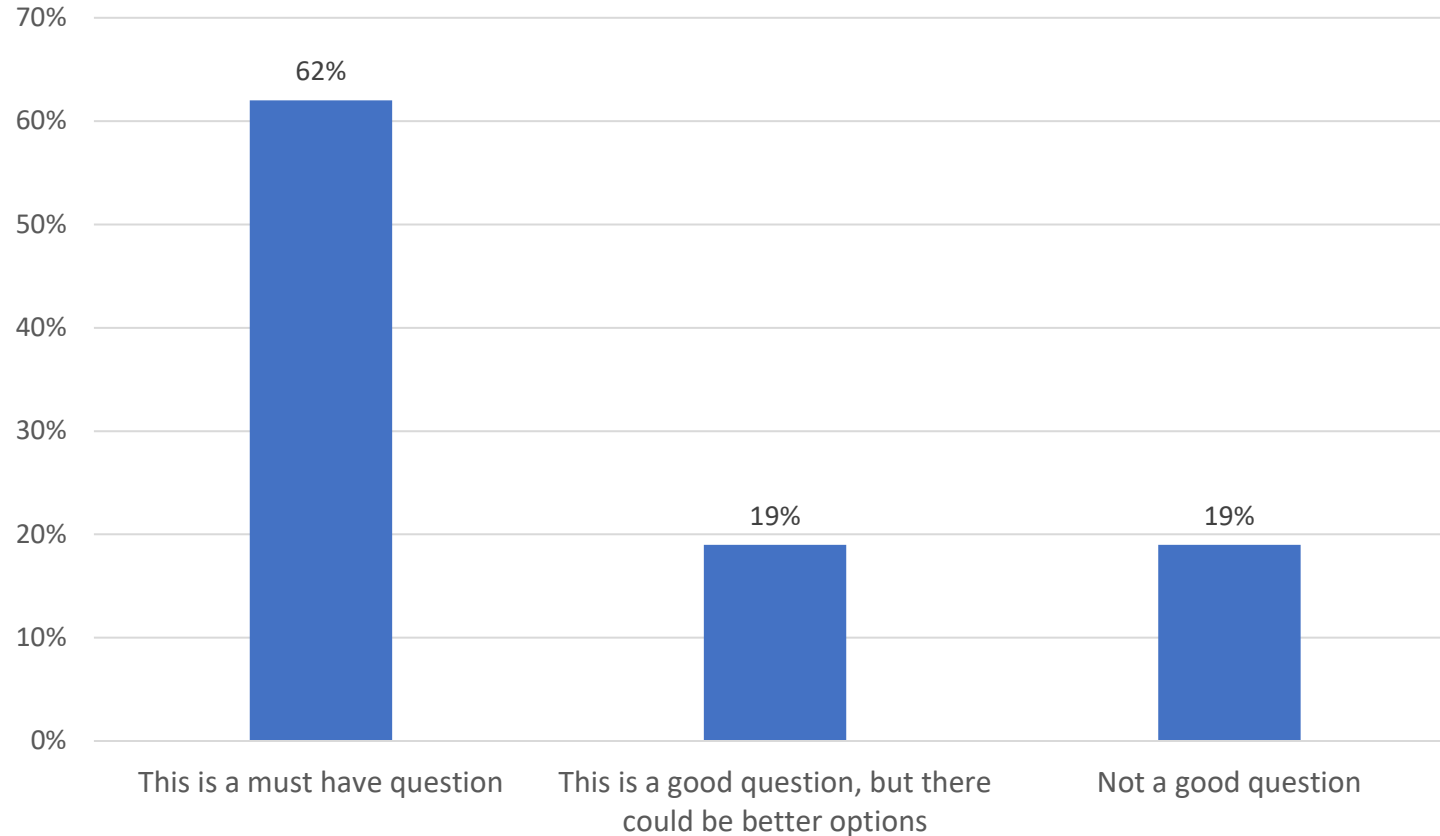

Understanding Attitudes about Vaccine Requirements

The only reason I have my child get shots is so that they can enter daycare, school or sports. Yes/No

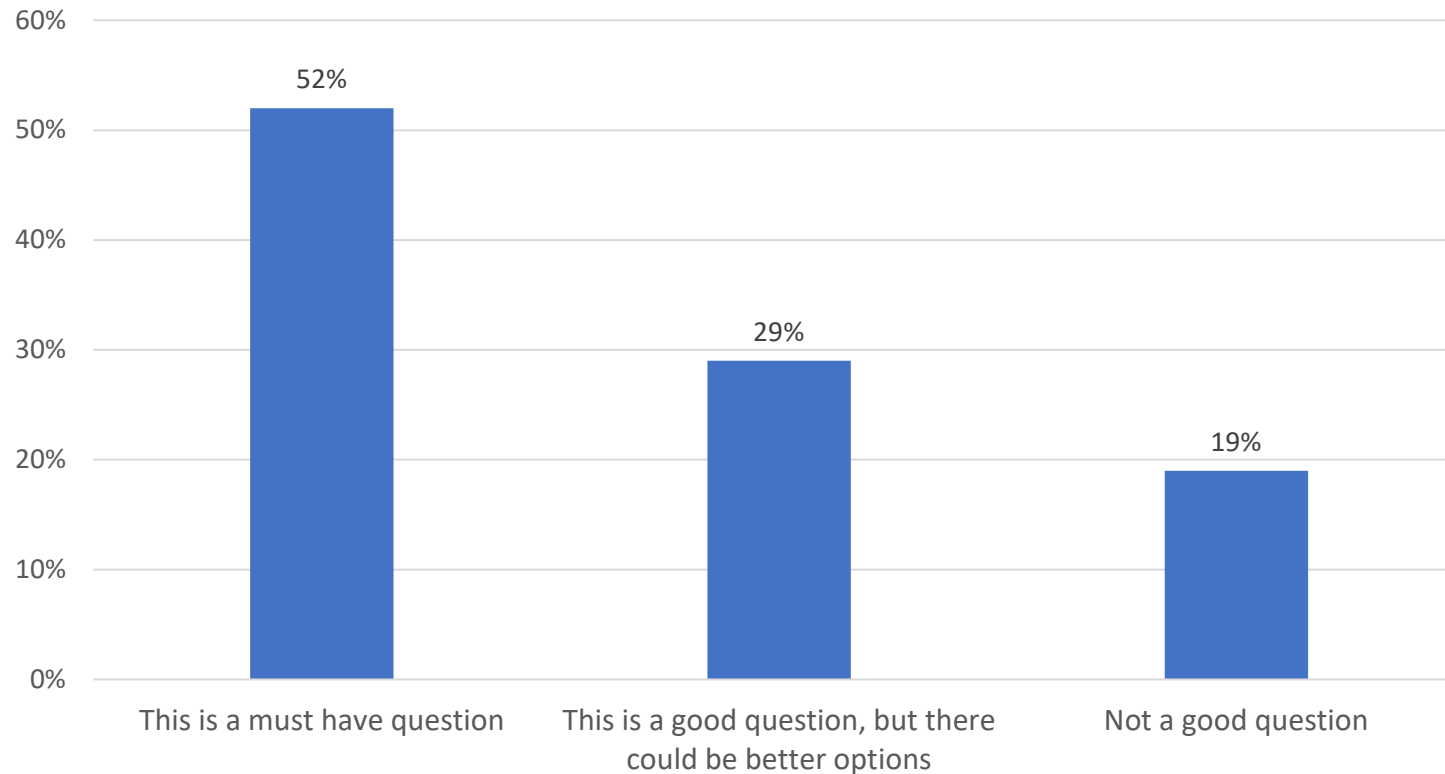

Understanding Attitudes about Vaccine Requirements

Does your child's daycare/school require/advise to have your child vaccinated? Do you agree?

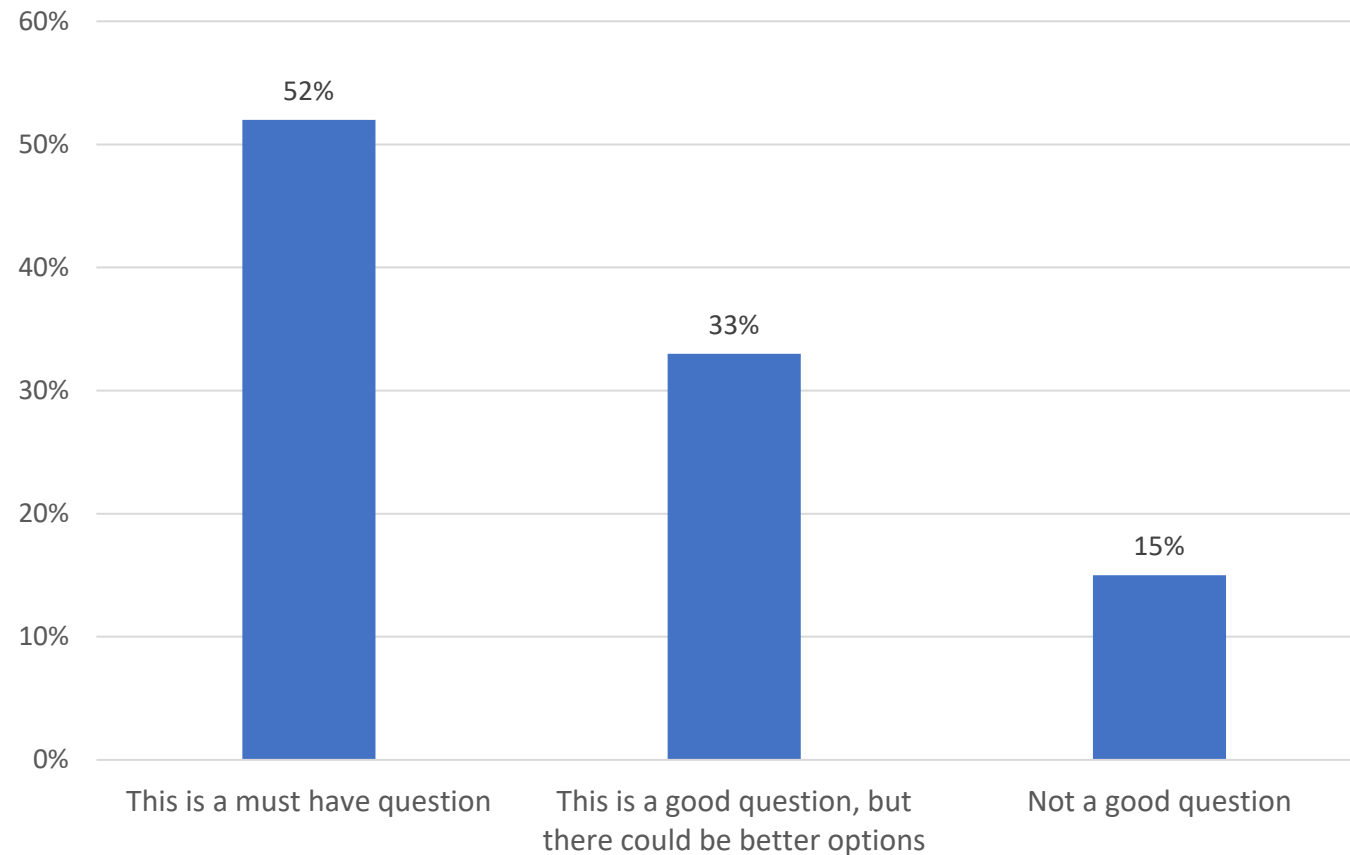

Understanding Attitudes about Vaccines

I agree that it is important for everyone to get the recommended vaccines for themselves and their children.

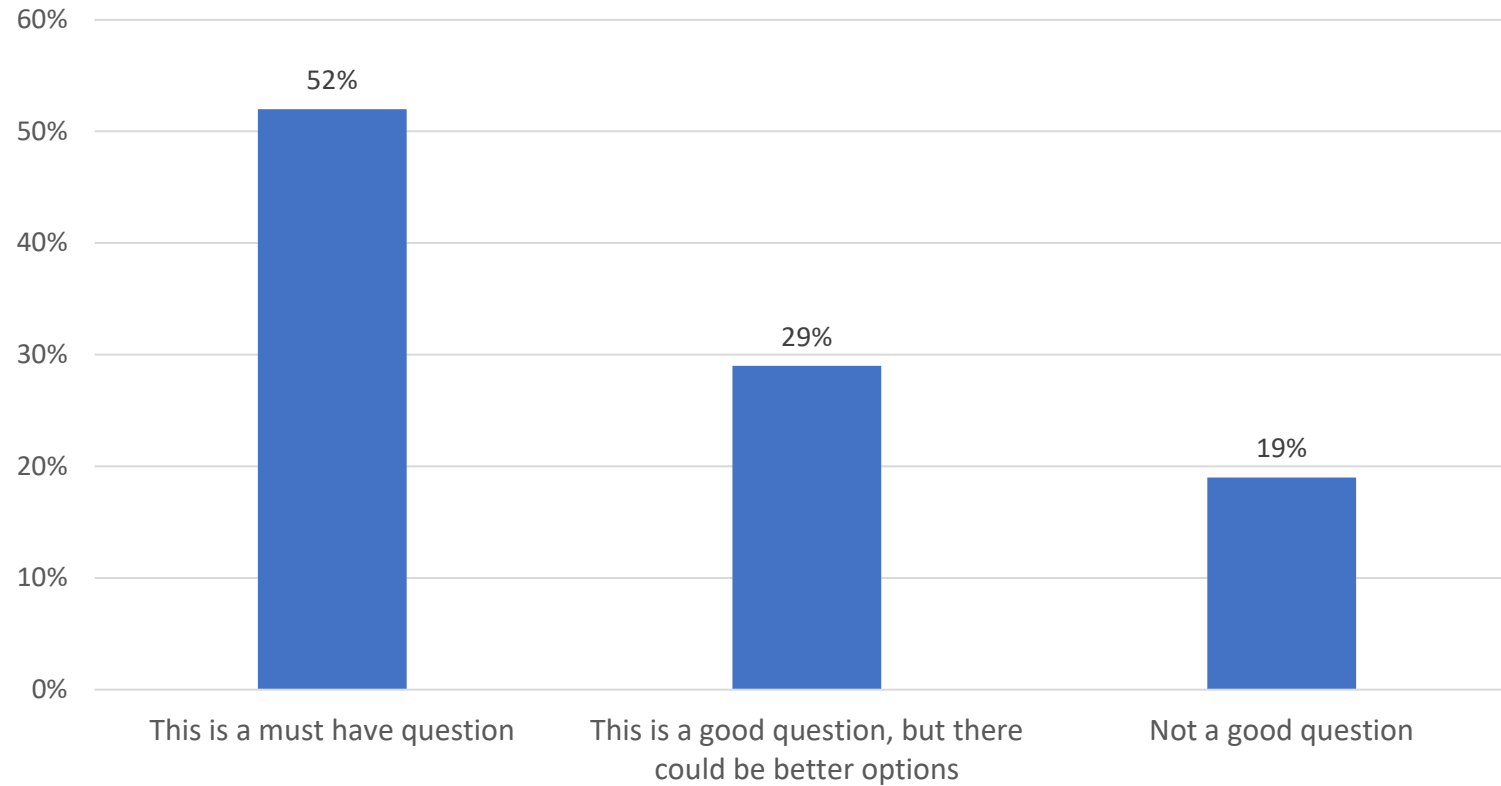

Understanding Attitudes about Vaccines

Do you think it's important to get a vaccine to protect those that cannot get vaccinated?

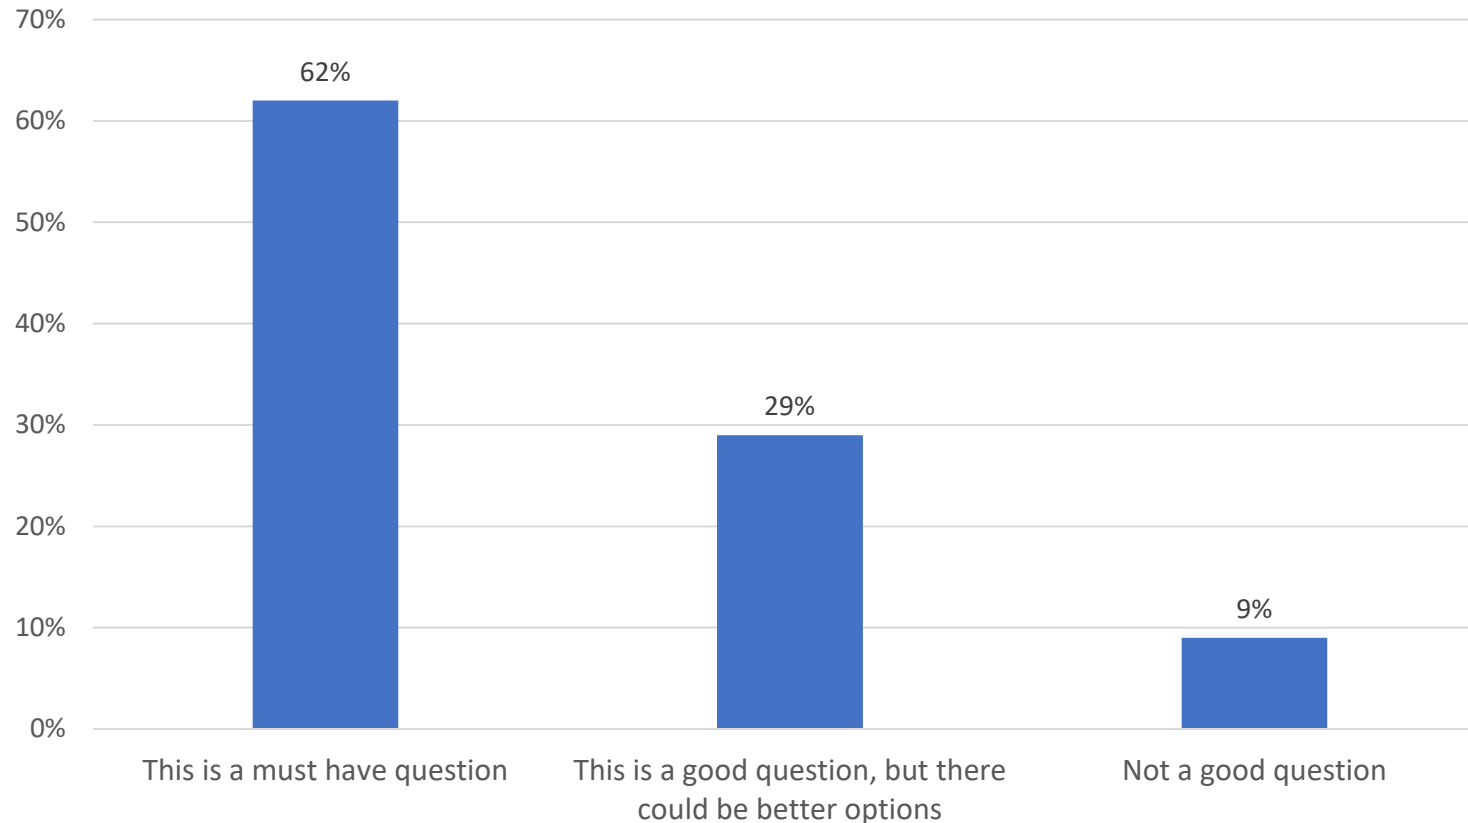

Understanding Barriers in Vaccine Compliance

Would the cost of a vaccine prevent you from getting it, even if you felt you or your child needed it?

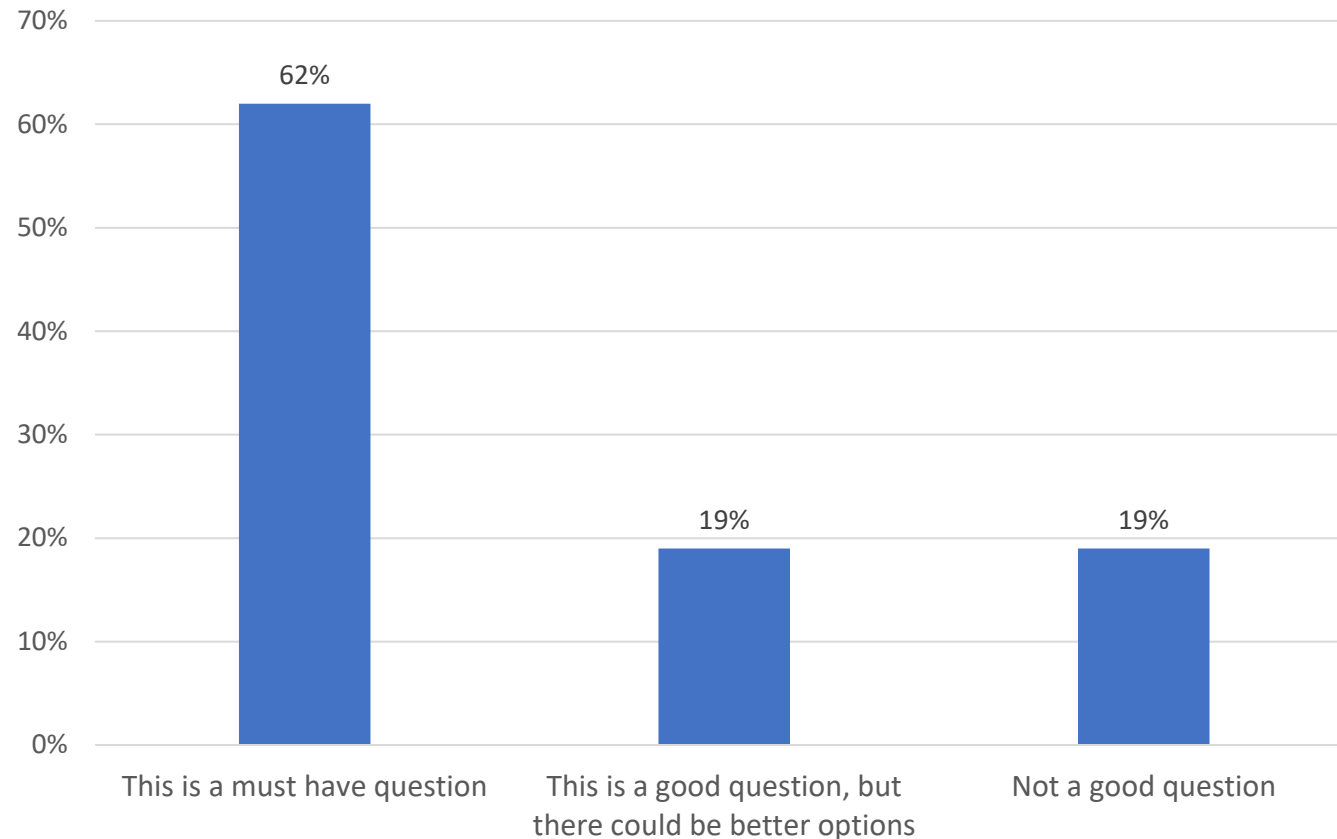

Understanding Attitudes About Vaccine Safety

How concerned are you that your child might have a serious side effect from a shot?

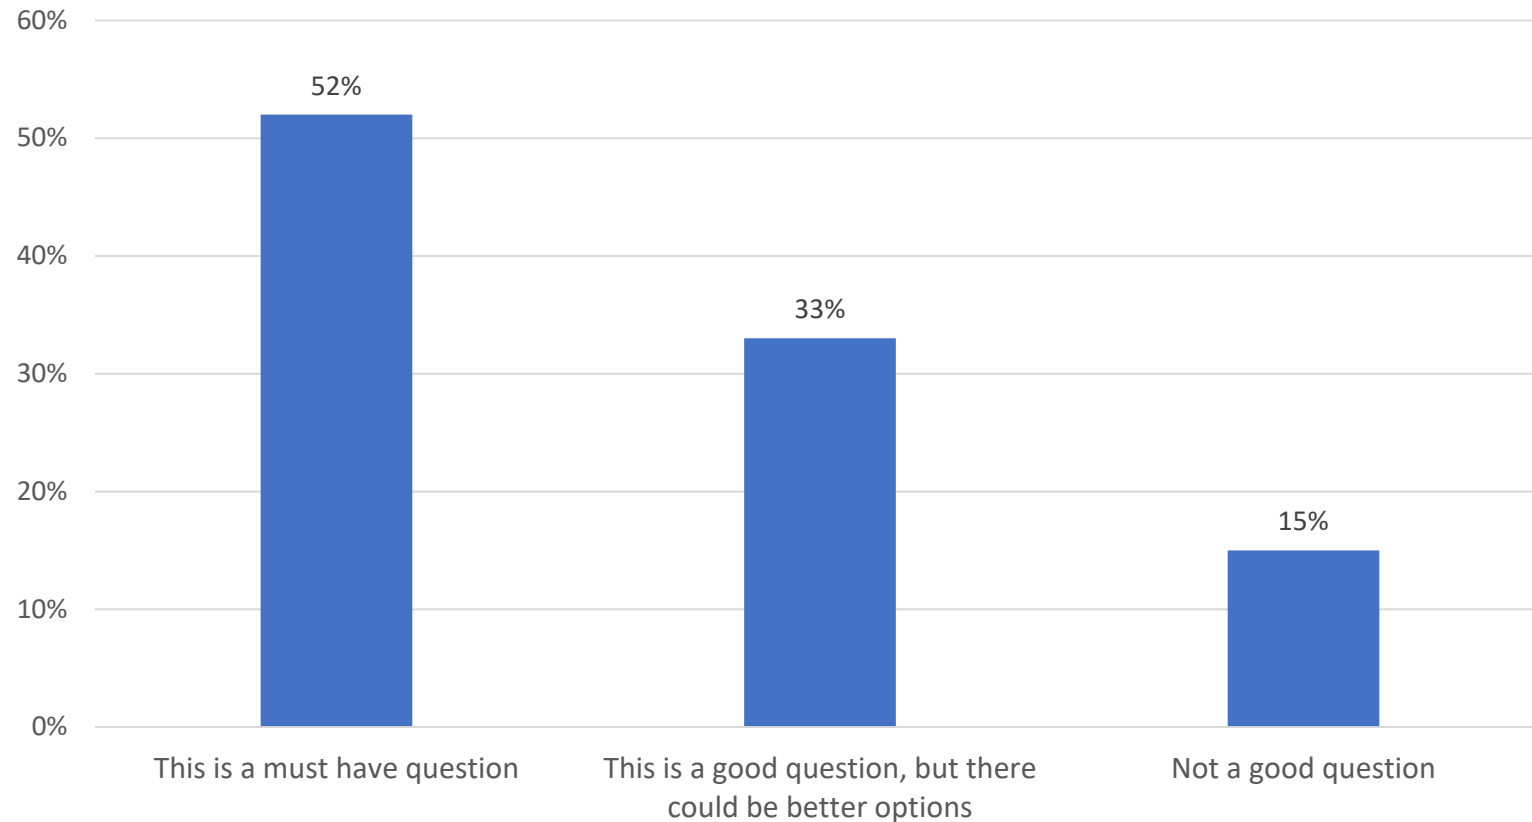

Understanding Attitudes About Vaccines

Do you believe that if you vaccinate your child, others are protected as well?

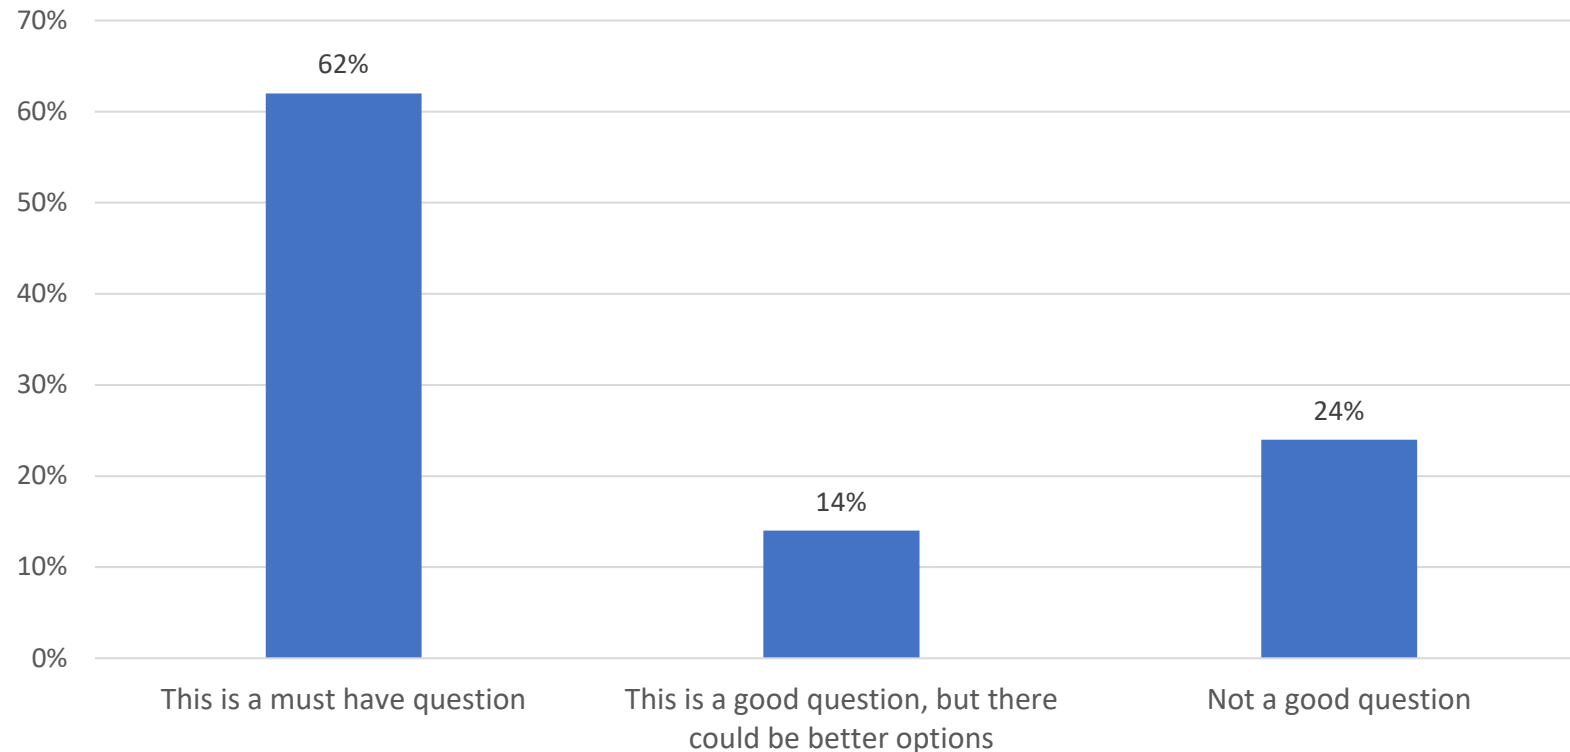

Understanding Attitudes About Vaccines

Do you believe vaccines are safe for yourself/your child/children? For those in your community?

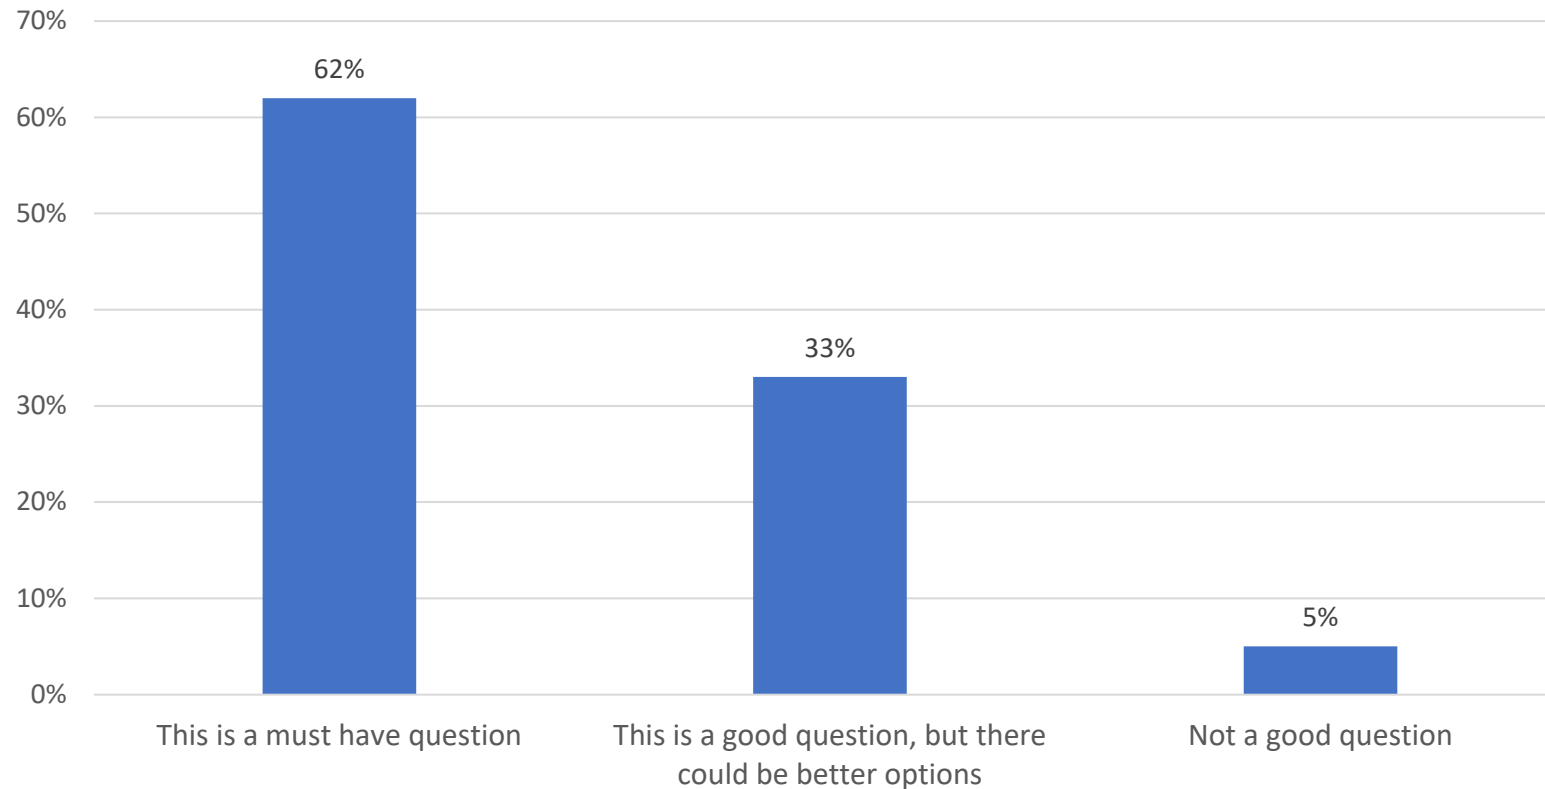

Understanding Attitudes About Vaccines

Would you let your child get vaccinated within a school-based immunization program? If yes, what are the advantages?

Understanding Attitudes About Vaccines

Did you ever refrain from having yourself/your child vaccinated during mass immunization campaign? Why?

Any other questions we should include in our Nevada Parent Survey?

- "If your child is/was not vaccinated according to the recommended vaccine schedule, what was your main reason? multiple choice with answers like: too many vaccines at once, child too young, fear of adverse reaction, lack of access to care, etc."

- "Has the push for the COVID vaccine made you question the safety or efficacy of other vaccines? If yes, why?"

- "Why would you refrain from having your child vaccinate? A.) religious exempt, B.) Medical Exemption, C) need further education, D) do not believe in the vaccine E) distrust the information provided."

- "As a follow up question to cost being prohibitive to getting their child vaccinated, I think asking parents if they're aware their child can receive no or low-cost vaccines at some providers through the Vaccines for Children program."
