## Health Blower Benefits Tips

### DO NOT USE THE BLOWER

if you have a Pacemaker, are pregnant, Menstruating, or have congenital heart disease.  
Anyone with an open wound, fracture or has metal plates / Pins/ Joints or Plastic surgical lens replacement in the eyes must not use this device over that part of the body.

- Frequency of therapy: 2 to 3x per day (with at least 4 hours between) is fine.
- Best length of treatment time = 15 to 30 minutes

Personal classic device will shut off after an hour to cool off. Limit treatments to 1 hour at a time.

- Some see results within 5 to 15 treatments. It depends upon the individual's state of health and issues.

The more chronic the issue, the weaker the patient, the more treatments may be needed

It may take up to a year of consistent use for some to show results

- Possible side effects when first beginning therapy can occur

May consist of increased pain, flare-up, vaginal discharge, heavy perspiration, etc. These indicate that the body is targeting the issue, is detoxing and is beginning the healing process. Side-effects tend to be very short-lived (several days)

- Hair and Scalp:  
Many report that less hair falls out and scalp issues heal.
  - Consider "blow-drying" your scalp and hair, instead of using a hair dryer
  - Blow dry" your hair to help it get thicker and healthier, while benefiting your scalp and brain.

Head blowing with high heat NOT advised for those with high blood pressure. .

## More Health Blower Info

The **Health Blower** device looks like a long hairdryer but is not (although some use it that way, too!). This product has been clinically tested for performance, and there is zero radiation emission.

It has a 3 in 1 core technology consisting of terahertz, quantum, and optical quartz. It is about the size of a hairdryer and does blow heated air or non-heated air (depends on how you adjust the switch) which delivers the healing waves of the terahertz band.

The individual or practitioner simply turns the device on and blows the air that sends the healing waves on areas of the body that need healing and repair. It usually takes at least 15 or 20 minutes a day, twice a day for 10 days to see good results. The Classic blower is the most affordable.

If you live alone, try treating the back and spinal regions from the front through your abdomen. Since the frequency reaches up to 11.8 inches, you will be well within the range on most people.
