

REASONS WHY YOU NEXT CONCRETE FLOOR SHOULD BE SEALCOATZ

Australian Owned & Manufactured!

SealCoatz is a proprietary, colorless, environmentally safe chemical solution that increases the surface strength of concrete floors subjected to pedestrian and vehicle traffic. **SealCoatz** penetrates concrete surfaces to seal, dustproof, densify and harden them through a chemical-ion exchange process, **SealCoatz** develops internal bonds which densify the concrete substrate into a hardened, chemically cured, homogenous concrete mass that dustproofs, resists abrasion, and reduces water and oil penetration.

BENEFITS & FEATURES

Environmentally Safe

VOC Free Formula

Non-Slip

Low Maintenance

Spill & Wear Resistant

Does Not Wear

Dustproofs

Hardens Concrete

SEALCOATZ

REASONS WHY YOUR NEXT CONCRETE FLOOR SHOULD BE SEALCOATZ

You want your floor to last longer

SealCoatz deeply penetrates the concrete surface and becomes a part of the concrete, densifying your floor for life. It creates an extremely durable, spill resistant, wear resistant, abrasion resistant, dustproofed concrete floor with increased strength and durability. **If you want your floors to last use SealCoatz!**

You want a tough floor

SealCoatz densifies concrete floors through a chemical reaction and reduces the surface porosity of the floor. **SealCoatz** increases your floor's surface toughness by densifying the cement paste. Floors treated with **SealCoatz** are greatly resistant to abrasion and wear.

You want to increase profits

SealCoatz treated floors provide a significant saving in maintenance costs over conventional acrylic, epoxy, and urethane sealers. A single application of **SealCoatz** is usually adequate for most floors. The deeply penetrating chemical action leaves no film and will not alter the non-slip texture of the concrete floor. Your long-term costs can be virtually eliminated with **SealCoatz**. **SealCoatz** is low maintenance, eliminating the need for repeated waxing, stripping, high-cost cleaning, and replacement. In fact, the more a **SealCoatz** floor is used and as it matures, the better it looks and more durable it becomes.

You want a safe floor

SealCoatz floors are safe from start to finish. **SealCoatz** is a proprietary, colorless, environmentally safe chemical solution. It is completely free of VOC solvents.

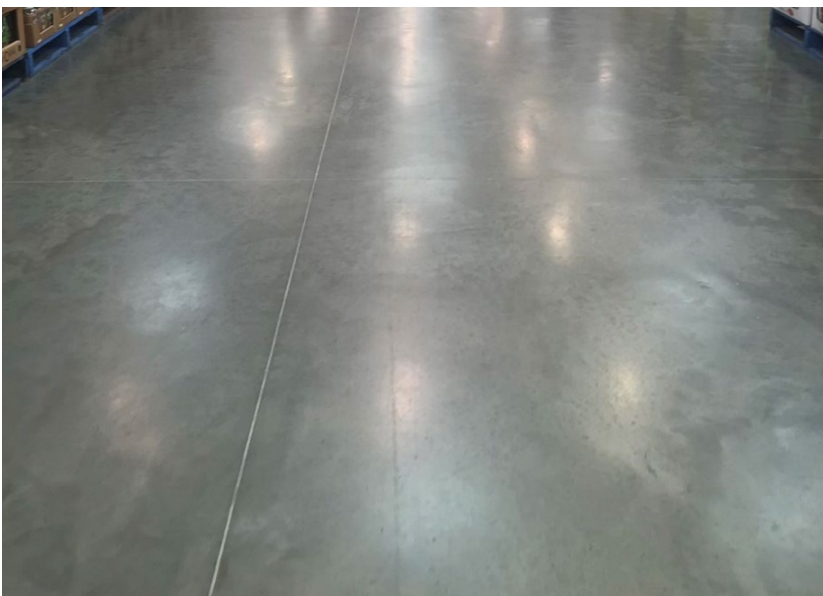

SealCoatz floors are high traction, some treatments can make your flooring more slippery, but **SealCoatz** doesn't alter the natural non-slip characteristics of a concrete finish.

You want a low maintenance floor

SealCoatz floors get better with time. Your **SealCoatz** floor will develop and polish over time with regular, easy maintenance and result in an easy-to-clean, long-lasting floor.

You want a protected floor

SealCoatz densifies and protects the Near Surface Wear Zone through a permanent chemical bond. The Near Surface Wear Zone is what protects the concrete from outside factors. It's the part of the flooring that is exposed to chipping, irreversible staining, abrasion, and general deterioration. When applied to concrete flooring, **SealCoatz** becomes an integral, permanent part of your floor.

SAFE!
TOUGH!
PROTECTED!
LOW MAINTANCE!
FLOOR THAT LASTS!
