

WHY SHOULD RESIDENTS POST THEIR ADDRESS NUMBERS AT THE BEGINNING OF THEIR DRIVEWAY?

- Emergency responders can only help you when they find your location.
- Posting your address number provides easy identification of your location for responders who are not always exactly familiar with your area.
- Every second counts during an emergency and posting your address number allows emergency responders to save critical time.
- Homes are often hidden from view at the beginning of the driveway, only posting numbers on your home does not help responders recognize where you live since they must first turn down your driveway to find your home.
