## **IMPORTANT NOTICE**

### Memorandum

To: The Citizens and Water Customers of the Town of Pinebluff  
From: Melissa P. Adams, Town Administrator  
Date: November 22, 2022  
Subject: Water turn-offs for water valve replacements

The Town will be shutting the water off on the east side of Town Thursday, December 1, 2022 to install water valves in order to eliminate having to turn the whole Town off when we have water leaks. We will be working on: (1) New England Avenue and US Highway 1; and (2) New England Avenue and Cherry Street.

Once service is restored, customers may notice cloudiness or air in the lines. We will flush hydrants, but residents are advised to flush their lines to remove excess air. If conditions persist for more than a couple of days, contact the Town Hall at 910-281-3124.

We are asking that our citizens and water customers be patient as our Public Works crew work diligently to replace these valves. Sometimes unforeseen things happen, and the water may have to be turned off for a longer period of time than what we anticipated. Please be patient and understanding, as we work to get these needed repairs completed. Thank you.
