

As we sit on the threshold of not only a new year, but a new decade, and more importantly, a paradigm shift for humanity, we must consider how we will maneuver in this new world dynamic. What do we want to contribute to humanity, and what do we want to manifest over the next several decades?

My name is Goddess Gillian and I have been a clairvoyant and clairaudient for most of my life. In addition, I have been actively focused on expanding my consciousness and my psychic abilities intensely over the last decade or more.

The last decade and the last several years specifically have been challenging in some aspect for every human on the planet. This global intensity, helped me focus on training my mind to stay positive, in a state of gratitude and manifestation, even in the face of massive challenges. The lessons have been profound. During this time, it became clear to me that the reason that life on Earth has been so challenging and intense is because the planet and its inhabitants have been experiencing the growing pains that happen just prior to a paradigm shift.

What I've been seeing and feeling in my meditations, and readings, is that a massive energetic transformation is imminent for in the entire human population. The last two years have been beyond

what most humans have experienced in their life times in terms of challenges and feeling thwarted. I've seen this across-the-board with my clients, and have experienced it myself. But psychically what I'm seeing now when looking at 2020 and beyond, is what appears to be a beautiful golden landscape that's ripe for Manifestation! The energy of 2020 is like having laser vision after being in the dark for a very long time. Everything that no longer works will fall away. This may not be a graceful transition and will in some cases cause great strife. However, it is all in what is manifested by

the collective.

Validating this, is the fact that the planet has actually moved into a place in the galaxy that has much more light. The light waves hitting the planet now are more than the human race has experienced in tens of thousands of years. This causing shifts in the planet as a whole energetically, and we as it's inhabitants are transforming our DNA, and coming into a state of expansion of consciousness and spiritual growth and awareness.

2020 is a significant demarcation of this new energy hitting the planet and the vibrational change that it will bring. So, as you embark on this new year, new decade, and new type of energy, think about what you want to manifest Your life and the lives of your children and your children's children. This is a turning point for humankind.

In this beautiful golden landscape of 2020 that is ripe for manifesting, are you going to throw out seeds of abundance, joy, financial success, amazing health, true love...Or are you or are you going to throw out seeds of fear, anxiety, and longing?? In this new energetic landscape, the seeds you throw out with your thoughts, words, and actions, will manifest faster and more expansive than anything you've ever experienced in your lifetime.

People that have really been wallowing in self pity, blame, and playing the victim role will likely suffer exponentially in this new energy, as they will manifest more of the same on a grand scale. Therefore, it's critical to focus on what is positive, and what is abundant, and what brings you joy. Those things will manifest into the most abundant time that you've ever experienced in your life and will trickle down to generations to come!

Knowing this, All light workers are being called forth at this time to focus on positivity in order to assist in the ascension of humanity into this higher vibration and frequency. The laser beam energy of 2020

will allow us to focus our minds to beam out positivity to the collective. This will help humanity take a quantum leap into our highest manifestation as Light Beings.
