November 2021 Newsletter

The Greater Cincinnati Orchid Society hopes everyone is staying healthy. We are having in person meetings back at the Civic Garden Center, we plan to offer online with Zoom also. We are also sharing members' orchids with an online Show-and-Tell.

Presidents Note

Greetings

Hope everyone is doing well.

Looks like our first frost is here and hopefully none of our members have any of their plants still outside. Even though we have some cold tolerant orchids I would still not recommend taking a chance with frost about to be more and more common this time of year.

October's meeting was a good one with Edgar Stehli talking to us on Tolumnia's. Many of us purchased some great plants from him. Because of scheduling conflicts, our November speaker is no longer Cordelia Head from J&L Orchids. We hope to have Cordelia come sometime in 2022. Our own Jim France will be our guest speaker in November. He will also be bringing plants for sale. More info is in the newsletter about his visit. Our meeting will be presented live and in Zoom format for those that can't attend. Hope to see many of you again.

Please read the upcoming newsletters, emails and website for society updates. Until next time, Happy Orchid Growing and Good Health.

John Jaworski

GCOS November 9 Meeting

This is an important meeting as the new slate of directors and the 2022 budget will be presented to members. Members will vote to approve both at the November members meeting.

The November speaker is Jim France. He will be speaking on “Current Breeding Trends in *Phragmipedium*” at 7:00 pm.

Beginners will meet at 6:00 with a Q & A on plants they are growing.

Orchid of the Month - *Bulbophyllum hirundinis* 'Windy Hill's Fireworks' AM/AOS

- Roger Miller

This very large genus contains about 2,000 species in the tropical areas of Asia. This particular species comes from Taiwan, Vietnam and close-by areas at elevations ranging from about 1,600 ft. to 9,800 ft. in damp, humid forests. Similar species include *Bulbophyllum fimbriperianthimum*, *Bulbophyllum electrinum*, and *Bulbophyllum setaceum*.

The pictured plant is in a 2" plastic pot and the actual plant is about 2" tall, making it a good candidate for windowsill culture. Like most "Bulbos" it likes fairly damp conditions, moderately bright light and gentle zephyrs to keep it happy.

Other aspects to note are: flowers are not fragrant (or Stinky!), seems to ramble less than some, and the flowers show quite a bit of color before they open fully. If you have a magnifier handy you will open yourself up to a fascinating flower.
