

# A.C.: AFTER COLLAPSE ® MANMADE DRUG AND EXTRACT CHARTS

Manmade (M) drugs are healthful medicines concocted for use by Survivors and NPCs. Raw drug ingredients are gathered and rendered into simple extracts that can be combined into manmade medicine. Referees are encouraged to describe raw drug ingredients as vegetation (see: Basic Skill, Botany) or animal parts (see: Basic Skill, Biology) that are uncooked. They are often stored in bottles, jars, and vials made of glass with corks or twist-off lids. Bags made of sackcloth or waxed paper may also be convenient for dry ingredients. Wooden boxes are also quite popular.

\*Creature venom is extracted from the internal glands of reptiles, spiders, sea life, etc. Unless stated otherwise by the referee, these toxins are already concentrated (see: Amount of Dose).

\*\*Unless the referee states otherwise, tree/bush bark and resins are always stored dry.

\*Referees decide if/when simple extracts need to be prepared in such very small amounts [i.e., .01 ounces (dry or fluid)]. The most common non-venomous manmade substances are not often potent enough to benefit Characters and NPCs.
