

A.C.: AFTER COLLAPSE ® OUTDOOR EQUIPMENT CHARTS

Outdoor equipment includes wardrobe items, shelter, and accessories that make it easier to complete a task or provide some protection from extreme heat or cold. Some items confer Armor Point Values (APVs) to protect Characters or NPCs who wear them. Enclave crafters are already busy creating replacements for synthetic equipment. Manmade products (M) are known to be less durable than most fabricated versions (F).

Material Attributes (MATs) for outdoor equipment represent how durable items are based on what they are made of [e.g., Adaptable Industrial Composites (AICs), canvas, leather]. Outdoor equipment can have Structure Point Values (SPVs) or Armor Point Values (APVs), as restricted by their Access and Distribution Category (ADCAT) designation [e.g., Civilian (CIV), Military (MIL), etc.]. Temperature Limits (TMPs) are comparable to those of consumer goods (e.g., TMP: 15-30).

It's common for Civilian (CIV), Government (GOV), or Medical (MED) outdoor equipment to have one form of Materiel Resistance [MAR; Biological Agents (BIO), Chemical Hazards (HAZ), or Nuclear-Biological-Chemical (NBC) threats]. At the referee's discretion, product characteristics often might include: a) Structure Point Modifiers (SPMs) or b) Armor Point Modifiers (APMs, as applicable).

CONDITION OF OUTDOOR EQUIPMENT		
<u>Random d6</u>	<u>Description</u>	<u>% of Value</u>
1	Ruined, utterly useless	0
2	Parts missing, dirty	25
3	Worn and dirty, still useful	50
4	Mild wear & tear, needs cleaning	75
5	Good condition, very little use	90
6	Mint condition, never been used	100
