

A.C.: AFTER COLLAPSE ® SMALL ARMS ACCESSORIES CHART

The following accessories can be manually attached to handguns, shotguns, and rifles in ways that improve their usefulness without conferring Recoil (REC), Accuracy (ACC), Damage (DAM), or Penetration (PEN) Modifiers.

SMALL ARMS ACCESSORIES

20 round	20	0.2 lb/90.72 g	45	10
30 round	50	0.25 lb/113.4 g	45	10
*Military (MIL) models cost twice as much and convert Structure Point Values (SPVs) to Armor Point Values (APVs). This could be important if and/or when referees allow equipment sacrifice. Survivors are rarely shy about telling stories about battles won or lost in which a random hit could have killed them – if that bullet hadn't been stopped by some piece of equipment!
