Your model should plan to be in class the entire class period.
Practice photography on these models
business building
class models scheduled with jessica on a specific date and time of the week.
Certificate of Completion

Licensing with Texas Department of State Health Services

Tattoo studio license Application website
<https://vo.ras.dshs.state.tx.us/datamart/mainMenu.do>

How do you license with the state?

There is a common misconception about licensing in Texas for permanent cosmetics. In fact, there is no board exam to get your license. You must pay a licensing fee to the state of Texas, you can not receive the legal license from your Academy. This license must be paid every 2 years to renew with the state. There will be an Inspector who will randomly inspect your building and services every year. We teach you how to pass your Inspections In our course!

When do you license with the state?

We are not responsible for your license, licensing must be done by TEXAS DEPARTMENT OF STATE AND HEALTH SERVICES. This is a separate fee and is not related to your course with our academy. You do not need to get the license right away once graduating. What you can do is wait until you find a location or studio to work out of, and then send in the tattoo studio application with a "zoning verification letter" from the city.

How much is the fee to apply for a license?

The cost of application can be up to \$1,000 every 2 years. It can go up or down, it just depends on what the state wants to charge.

What is my classification under the state?

Upon applying for the tattoo studio license, you are recognized as a tattoo studio. This is what is shown on the official website.

COURSE TUITION
