

# HELP KINSLEE FIGHT LEUKEMIA

Kinslee Peirce, a 10-year-old local girl was diagnosed with Lymphoblastic Leukemia. Kinslee's journey is just beginning. She will be undergoing treatment for the next two years, with the most intensive phase taking place over the next several months. For the next nine months, Kinslee will be living at the Ronald McDonald House in Seattle so she can remain close to the specialized care she needs.

All donations will go directly toward medical bills, medications, transportation, lodging, and supporting the family's ability to stay close during this long and difficult road.

Every donation, no matter the amount, brings comfort, relief, and hope to Kinslee and her loved ones.

**Thank you for standing with the families  
as they face this battle together.**
