

Tree Bird Suet Core Comparison Test vs Store Bought Suet

The Tree Bird Super Suet Core is on the left and a core made of store bought suet is on the right. These cores are made to slide into the suet tubes on the Tree Bird Feeder Trunk.

Following is a time lapse of suet cores inserted in the Tree Bird Feeder at 2 PM on a Sunday afternoon. The top core is a Tree Bird Super Suet Core and the bottom core is one made from store bought suet. Photos on the left are from the north side of the feeder and the photos on the right are from the south side of the feeder.

2:00 PM

4:30 PM

Both tubes are filled to the end of the tube on both sides.

The lower tube with the store bought suet has not been touched. The Tree Bird Suet has been eaten to a little over an inch on both sides.

11:00 AM (Next Day)

As you can see the Tree Bird Suet at the top tube has been completely eaten. The store bought suet has hardly even been touched. If you want to attract birds, you need to use quality feed and Tree Bird Brand is the best you can get!
