

Oversided Printing

Outdoor Banners Available in any size. 13oz. and 8oz.

Intended for outdoor use, can also be used indoors. Inks are UV Cured (dried). Waterproof & durable. This material is typically used for billboards, building wraps, banners, event flags, trade show signage, parades, etc.

2' x 6' Grommets and Hemmed on all sides	\$69.00
3' x 10' Grommets and Hemmed on all sides	\$125.00
6' x 15' Grommets and Hemmed on all sides	\$245.00

Blackout Posters Available in any size.

Blockout posters are an economical paper option featuring thickness and durability. The 12pt C2S stock is produced by laminating two 6pt coated sheets with a black adhesive middle layer; the semi-gloss surface and blackout center keep light out, ensuring 100% opacity.

18 x 24	\$29.00
24 x 36	\$39.00
36 x 48	\$79.00

Creative Services

Genuine Typesetting

Chesterfield Printing offers the finest typesetting available.

There is a huge difference in typing and typesetting. These days everyone seems to think that they can create a professional printed piece. Not so. The difference is readily apparent when viewed side by side. Typing is a thing you do. Typesetting is an art form and can take any printed piece from OK to AMAZING.

Typography\$75.00 hour

Professional Artwork

Chesterfield Printing knows that first impressions are everything. Your document may look great on screen but be unusable in the professional print industry. Folds have to line up. Artwork resolution must be proper to insure the smallest file size while affording for the best possible print quality. Did you check that your blacks are created in Rich Black? Rich black gives your documents that rich full bodied color. There is not much sense in spending hours creating a beautiful piece on your computer that turns into an ugly duck on paper.

Graphic Design and Branding\$80.00 hour

Call Chesterfield Printing Today

Chesterfield Printing offers the same features as other printers with some surprising differences.

High Definition Printing

At Chesterfield Printing we do our best to maintain the fidelity of your creative intent through the complex process of reproduction in print. While printing 200 lpi may be satisfactory, we have gone one huge step further with the adoption of FM screening method that brings near photographic quality.

Our State of the Art Technology eliminates halftone screen angles, rosettes, and screening moiré patterns while preserving the desirable details in your artwork.

Our screening process employs 20 micron dot size which is equivalent to 500 lpi.

Delivery and Turnaround

Chesterfield Printing offers different types of turnaround options depending on the product, we have

Next Day • 2-4 day • 5-7 day • 7-9 day Turnarounds

At Chesterfield Printing we go to any length to save you money on your projects. If we can expedite your printing without up charges then consider it done.

We do all we can to get your printing to you fast and accurately.
