What We Do

Close the Loop Programme

'Close the Loop' means that in each locality we ensure that all mother dogs are sterilised, and then the puppies are sterilized at the right age, with the help of the caregivers.

This ensures that locality by locality we reduce suffering of unwanted pregnancies in dogs, and reduce their suffering.

Pup Vaccination Programme

We believe each puppy on the street has as much right to live a healthy life as a human baby does.

We run our Vaccination Programme to give the pups a fighting chance to live. To reduce their suffering.

Humane Education Programme

We aim to educate children at a young age on how to understand dog behaviour.

We teach them how to be safe from rabies, and reduce risk of dog bites. We create compassion in their young hearts so they grow up to be the change we want to see.

Compassion reflects our humanity

Equine Welfare Programme

Owners of equine animals lack of awareness of animal rights and knowledge of the right way to take care of them. Horses, mules and donkeys suffer due to lack of medical care and awareness of basic preventative measures.

We work alongside owners to enhance the animal's health and reduce suffering.

Advocacy & Support

We believe in building a movement by bringing about mindset changes in the community, academia, municipal bodies, and the law enforcement agencies.

We help create a self sustaining platform for helping protect our street animals and reduce their suffering.

Our Impact

2300+

Puppies vaccinated

1300+

Dogs sterilised

6200+

Children educated

400+

Rabies awareness surveys done

Jaipur Equine Assessment baseline completed
