# What We Do

## Sterilization to reduce human-animal conflict

We conduct sterilization drives to reduce the number of homeless animals suffering on the streets.

It's a humane step toward controlling the stray population and giving each life a better chance.

## Rescue & rehabilitation of injured strays

From accident-hit dogs to abused animals, our team works day and night to rescue, treat, and rehabilitate them with love, care, and medical support.

## Community outreach to promote kindness

We work closely with local communities to spread awareness about animal rights, legal protections, and simple acts of compassion that make a big difference.

## Vaccination against deadly diseases

Through regular vaccination programs, we protect stray animals from fatal infections like rabies and parvovirus, keeping both animals and communities safe.

## Humane education for children

We believe kindness starts young. We run interactive programs that teach children empathy, responsibility, and how to treat animals with respect and care.

## Collaboration

We partner with other NGOs to deliver our programs so we can maximise our impact.

# Compassion reflects our humanity

# Our Impact

**2300+**

Puppies vaccinated

**1300+**

Dogs sterilised

**400+**

Rabies awareness  
surveys done

**6200+**

Children educated

## Get Involved

Together, we can  
create a kinder world
