## BLUE SUGAR ~ Hybrid

Blue Sugar is a Sativa-dominant hybrid strain that is genetically linked to Blue Dream and Sugar Kush. Blue Sugar seems to provide a look and smell like Cannabis Sativa. However, if you aren't careful with the Blue Sugar strain, it can have some intense couch-lock capability. This is great for full body pain relief, especially when medicating in large quantities. This heavy effect stems from the Indica lineage of Sugar Kush. The Sugar Kush strain was chosen for its ability to increase the yield, add a bit more stoniness to the equation, and improve the show quality of the bud structure.
