CHERRY COOKIES ~ Hybrid

Cherry Cookies is one of the most popular Girl Scout Cookie crosses to date, ranking next to Pink Cookies and Thin Mint Girl Scout Cookies. With similar genetic parentage, Cherry Cookies derives from the blending of Cherry Pie (aka Cherry Kush) and Cookies F2. This cross preserves the tight, slightly purple buds and deep orange pistils while accentuating the cherry tang and tartness on the nose and exhale. This strain behaves like a GSC, offering a medical-grade sedation on the body with an alert mental state.

Its indica body effects take a little longer to feel than the initial head haziness, but once they do, everything will feel fine.

However, if you aren't careful with the Blue Sugar strain, it can have some intense couch-lock capability. This is great for full body pain relief, especially when medicating in large quantities. This heavy effect stems from the Indica lineage of Sugar Kush. The Sugar Kush strain was chosen for its ability to increase the yield, add a bit more stoniness to the equation, and improve the show quality of the bud structure.
