What makes an 'Airlift' lash lift different to the rest?

With *AirLift*, you can select the 'desired curl' for your natural lashes!

The diagram on the left refers to the length of your natural lash and shows the curl that can be achieved with each AirLift Shield.

For example, if your natural lash is 9mm in length, to achieve a 'D' curl lift, the correct shield to use is 'S'

Think your lashes are too short? 4mm lashes can be lifted to a 'C' curl
