WALL PANELS**

WHY PVC WALL PANEL?

LIGHTWEIGHT

12X Lighter

Thanks to its acrylic-based structure, PVC Wall Panels are on average 12 times lighter than marble or ceramic alternatives.

Easy to Carry and Use

Because PVC Wall Panels are much lighter than marble, they can be transported and installed easily without the need for heavy equipment.

Does Not Add Structural Load

PVC Wall Panels do not add extra weight to buildings. Their light structure ensures high safety during installation and in case of earthquakes.

EASIER INSTALLATION

3X Faster Installation

Time matters. PVC Wall Panels can be installed three times faster than traditional ceramics or marble.

Dust-Free, Easy Cutting and Sizing

PVC Wall Panels can be easily cut or sized without producing dust, making the process cleaner and more practical.

No Need for Washing

PVC Wall Panels, thanks to their smooth surface, do not require washing after installation. Any dust or residue can be wiped away instantly.

RELIABILITY

Does Not Harbor Bacteria

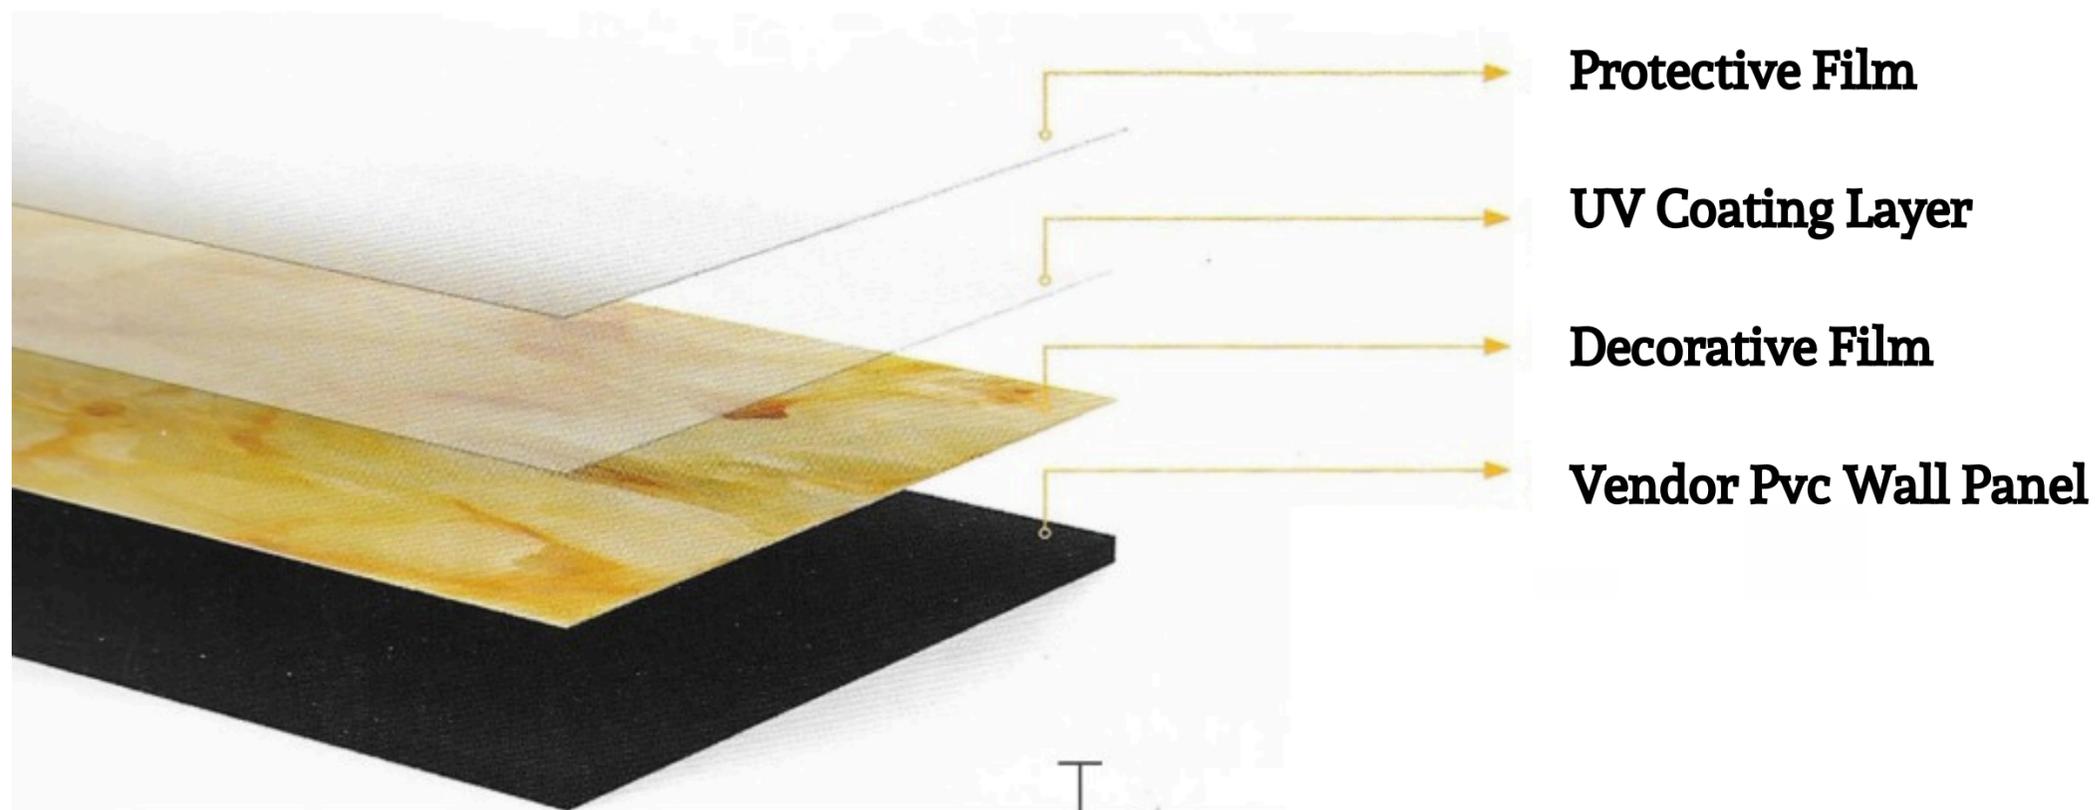

PVC Wall Panels are laboratory-tested and proven to be resistant to bacterial contamination. They are 100% hygienic and do not harbor germs.

Water Resistant

PVC Wall Panels are water-resistant, making them ideal for wet areas. They do not swell, deform, or lose color when exposed to water.

Fire Resistant

PVC Wall Panels are resistant to fire and certified with a B1-level fire safety rating, ensuring maximum protection in case of fire.

Protective Film

UV Coating Layer

Decorative Film

Vendor Pvc Wall Panel

2.8mm

Thickness

WE FIT EVERYTHING INTO 2.8 MILLIMETERS

For your comfort, we've captured the elegance of marble in just 2.8 mm thickness.

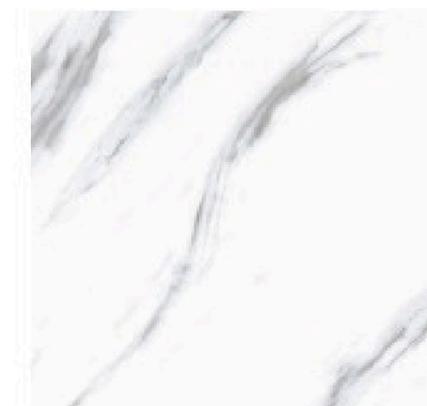

Pvc Wall Panels provide durability and strength while offering the aesthetic beauty of natural textures through their decorative film layer.

The UV layer adds a high-quality, glossy surface that is easy to clean and maintain. The protective film keeps the panel safe during installation and setup and can be removed once installation is complete.

Pvc Wall Panels can be used on both walls and ceilings.

PANEL & PALLET DIMENSIONS

1

60 × 120 PANELS (0.72 m²)

Pvc Wall Panels are ideal for creating a tile-like appearance by assembling multiple pieces on interior walls.

1 box = 4 panels (2.88 m²)

1 pallet = 80 boxes (230.4 m²)

Panel size: 60 × 120 × 2.2 cm

Pallet dimensions: 121 × 121 × 147 cm

60 x 120 x 2.2 cm

121 x 121 x 147 cm

2

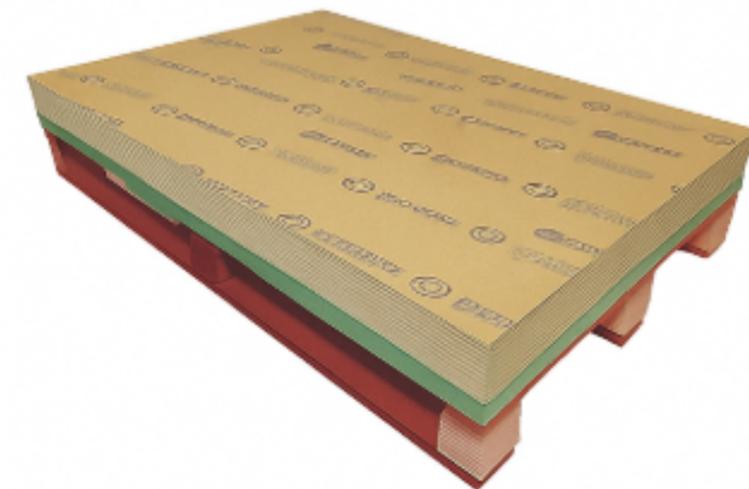

122 × 244 PANELS (2.97 m²)

Recommended for larger surfaces. One-piece panels create a continuous and seamless pattern, offering a sense of depth and integrity.

1 pallet = 80 – 100 panels (237.6 m² – 288 m²)

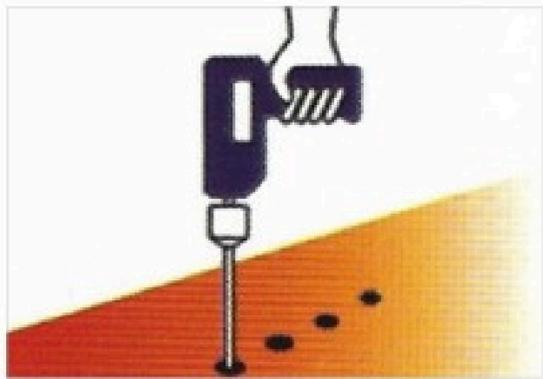

Panel size: 122 × 244 × 2.8 cm

Pallet dimensions: 123 × 245 × 45 cm

123 x 245 x 45 cm

PROCESSING

DRILLING

Pvc Wall Panels can be drilled with any type of drill.

SIZING

Panels can be quickly and easily resized using a table saw.

CUTTING

Panels can be shaped using circular saws or jigsaws.

SANDING

Rough edges can be easily smoothed with sandpaper.

F.A.Q. – Frequently Asked Questions

What is the warranty period?

If the panels are installed according to the installation manual, we provide a 10-year warranty. We guarantee that there will be no cracks or color deformation during the warranty period.

Can Pvc Wall Panel be used in wet areas?

Yes. Pvc Wall Panel is water-resistant and suitable for wet areas such as bathrooms. When installed properly, it provides a waterproof surface.

Can Pvc Wall Panel be installed on drywall?

Yes, but a primer coat should be applied to the drywall before installation. Otherwise, the drywall surface may absorb excessive moisture.

Can Pvc Wall Panel be installed directly on existing ceramic or marble surfaces?

Yes. Pvc Wall Panel can be applied directly over existing tiles or marble surfaces.

Can Decopa Stone be used on floors?

Unfortunately, no. Decopa Stone panels are designed only for walls and ceilings.

Can Pvc Wall Panel be installed directly on shower cabins or bathtub walls?

Yes. Panels can be applied on shower or bathtub walls using silicone adhesives at the connection points.

How can I clean Pvc Wall panels?

Panels can be easily cleaned with a soft sponge and non-abrasive detergent.

Can Pvc Wall panels be stored vertically?

No. Pvc Wall panels should always be stored flat and horizontally.

What is the weight of Pvc Wall panels?

The average weight is 7.5 kg/m².

Is Pvc Wall Panel waterproof?

Yes. Pvc Wall panels are completely waterproof.

Can you produce custom designs or patterns for Pvc Wall panels?

Yes. For orders above 500 m², we can produce panels in custom colors or designs upon request.
