

# / BOAT & PONTOON PROTECT'R CANOPIES

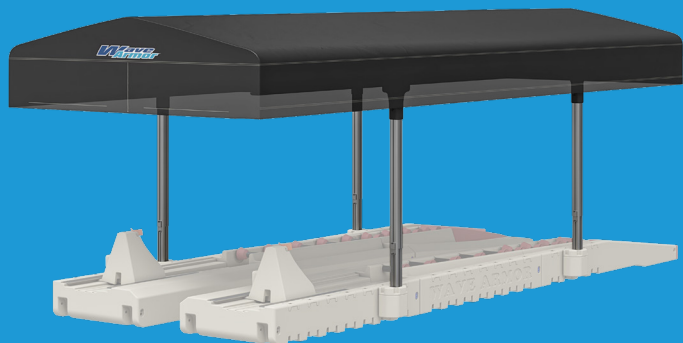

## Protection from the elements.

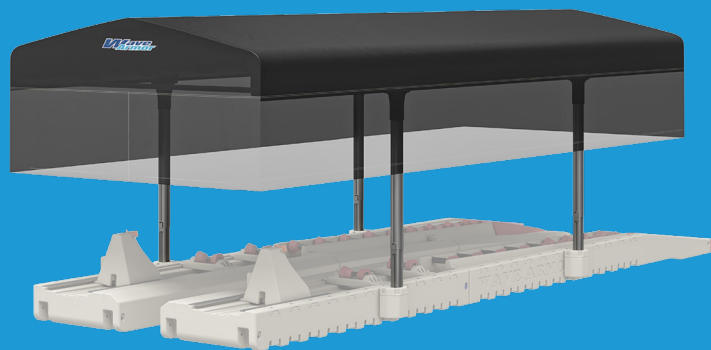

The perfect solution to safeguard your boat, pontoon, or personal watercraft from the elements - specifically designed for Wave Armor ports.

Constructed using our rugged rotational molded process; the new canopy features lightweight, yet incredibly strong trusses secured to a rigid aluminum frame, and paired with adjustable aluminum columns. Our UV resistant Wavebrella™ material is a marine grade canvas to fend off sun, rain, and debris. The canopy also features fully-screened ends for ventilation with 24-inch perimeter drape for even greater protection.

The result is a lightweight design that won't oxidize, with a clean, custom look. Best of all, the Wave Armor ProTect'R canopy features telescopic columns providing nearly 4-feet of height adjustment to accommodate nearly any pontoon or boat.
