

A one stop solution for electrical engineering, from factory maintenance programmes to fully bespoke production solutions. Maintenance and repair services combined with the supply of top quality branded equipment.

DLGP195SET2

1-13mm (25 Piece) TiN Coated HSS 5% Cobalt Jobber Drill Set - DLGP-HSS-SET Series (YG-1)

Product Information

Features & Benefits

This TiN Coated DLGP HSS 5% Cobalt 5xD jobber drill set comes in a 25 piece (1-3mm in 0.5mm increments or 1-10.5mm in 0.5mm increments) The 5% cobalt substrate with TiN coating ensures greater toughness and tool life over standard HSS. It is ideal for general drilling on all materials where a variety of hole sizes are required. This set is supplied in a metal storage case.

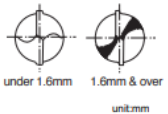

- GOLD-P TiN Coated 5% Cobalt HSS Drill Set.
- 5xD Jobber Length Drills.
- DLGP195SET2 - 1-13mm in 0.5mm increments (25 pcs - 1mm, 1.5mm, 2mm, 2.5mm, 3mm....., 13mm).
- TiN coating on working area with 5% cobalt content reduces cost and increases tool life compared to standard HSS drills).
- Normal point up to 1.6mm, split point over 1.6mm for higher accuracy drilling.
- Ideal for general drilling on all materials.
Great performance across all machining conditions

Substrate Increments HSS 0.5mm

Coated

- ▶ **Flute Geometry** : Right hand helix
- ▶ **Point Angle** : 135°, up to 1.5mm : Normal point
over 1.5mm : Split point
- ▶ **Surface treatment** : Bright body, TiN coating on working area
- ▶ **Application** : Drilling stainless steels, difficult to cut materials such as titanium alloys and inconel.
