MULTIDECK-REMOTE
675&735MMDEPTHWITHNIGHT CURTAIN

Features
- R404a refrigerant.
- Low energy consumption and high cooling capacity.They are achieved by increasing evaporation temperature and heat exchange amount of effi cient evaporator.
- Designedly a solenoid valuve in each cabinet,in front of which a fi lter is installed with the purpose of guarding against blockage,reducing diffi culty and time of installation.
- Huge open space,low front edge,all maximize display eff ect.
- More volume is achieved by maximizing shelf depth in a certain freezer width.
- To make the most of the depth of display rack,this gives a larger eff ective volume.
- LED top lamp,with shelves LED light and non-lamp for optional.
- Super wide night curtain minimizes the gaps between curtains to save more energy.
- Top tubing design makes construction easier.
- Off -cycle defrost reduces energy consumption.
- Glass gable and solid gable for optional.

# MULTIDECK-REMOTE
675&785MMDEPTHWITHDOUBLE GLASS DOOR

Features
- R404a refrigerant.
- Low energy consumption and high cooling capacity.They are achieved by increasing evaporation temperature and heat exchange amount of effi cient evaporator.
- Designedly a solenoid valuve in each cabinet,in front of which a fi lter is installed with the purpose of guarding against blockage,reducing diffi culty and time of installation.
- Huge open space,low front edge,all maximize display eff ect.
- More volume is achieved by maximizing shelf depth in a certain freezer width.
- To make the most of the depth of display rack,this gives a larger eff ective volume.
- LED top lamp,with shelves LED light and non-lamp for optional.
- Super wide night curtain minimizes the gaps between curtains to save more energy.
- Top tubing design makes construction easier. • Off -cycle defrost reduces energy consumption. • Glass gable and solid gable for optional.

Features

- R404a/R744 refrigerant
- For the purpose of high effi ciency and low energy consumption,increase the heat transfer,we use effi cient evaporator to increase the evaporation temperature and exchange amount.
- There is a solenoid valve for each cabinet .We put a fi lter in front of the solenoid valve to reduce the diffi culty and period of installation,limit the risk of dirt blockage.
- Low front edge with huge open space maximizes the food display eff ect.
- Maximize the shelf depth with in a limited freezer width to provide more eff ective voiume
- Optional high effi ciency fan and LED lamps can be selected according to customers'requirement
- Top tubing design makes construction easier
- Ultra wide high quality night curtain minimizes the gags between curtains to save more energy.
- Off -cycle defrost reduces the energy consumption.

918MMDEPTHFREEZERWITH NIGHT CURTAIN

Features

• R404a/R744 refrigerant.
• To reduce energy consumption,increase cooling capability,we use effi clent evaporator,increases the evaporation temperature to-30degree.
• There is a solencid valve for each cabinet.We put a fi lter in front of the solenoid valve to reduce the diffi culty and period of installation,limit the risk of dirt blockage.
• Low front edge with huge open space maximizes the food display eff ect.
• The glass door frame uses integrated structure,easy for assembling. It has high intensity and luxury appearance.
• According to sustomer's requirement ,anti-mist fi lm can be used to provide a better display eff ect.
• Optional high effi ciency fan and LED lamps can be selected according to customers'requirement.
• Top tubing design makes construction easier.
• Plastic divider is a standard confi gure.It separates the space between each door,eff ectively prevent cold air leak,making it more energy saving.

• R404a refrigerant.
• Low energy consumption and high cooling capacity. They are achieved by increasing evaporation temperature and heat exchange amount of effi cient evaporator.
• Designedly a solenoid valuve in each cabinet,in front of which a fi lter is installed with the purpose of guarding against blockage,reducing diffi culty and time of installation.
• Smaller depth for space saving.
• Huge open space ,low front edge,all maximize display eff ect.
• Incline shelves design,easy for display.
• Suitable size baskets,convenient for loading goods.
• LED lamp
• Super wide night curtain minimizes the gaps between curtains to save more energy.
• Top tubing design makes construction easier.
• Off -cycle defrost reduces energy consumption.
• Glass gable and solid gable for optional.
