### 1. Introduction

Welcome to the world of Niftymon, a unique integration of NFTs on the Ravencoin blockchain within Discord. With the Niftymon Mint Bot, users can mint NFTs, engage in thrilling battles, and immerse themselves in the Niftymon universe, all from the convenience of Discord.

### 2. Setting Up

Before diving into the Niftymon universe, users need to set up their Ravencoin address:

```
!address <paste_ravencoin_address>
```

Registers a Ravencoin address with the bot.

Your minted Niftymon will be sent to this address.

### 3. Command Descriptions

#### Balance & Token Management

`!loadbalance` Retrieves your current NIFTYMON Token balance.

Each NIFTYMON Token is used for minting.

`!buy <amount>` Purchase a specific number of NIFTYMON tokens.

1 NIFTYMON Token is equivalent to 150 RVN.

`!buy_pack` Acquire a pack of 10 NIFTYMON tokens at a discounted rate of 1,000 RVN.

After transferring the RVN, paste the transaction ID (txid) for verification.

`!verify <paste_txid>` Verify your transaction by pasting the transaction ID. (ONLY FOR

`!loadbalance` command.

This credits your balance with the purchased NIFTYMON Tokens.

!account

Displays your current NIFTYMON Token balance.

## 5. Safety & Best Practices

Protect Your Information: Never share private keys or any sensitive details.

Command Use: Always use commands in designated bot channels to maintain an organized server environment.

Pinned Messages: Keep up-to-date with the latest Niftymon news!

Stay Informed: Regularly check announcements related to the bot. Stay updated with new features or changes.

## 6. Troubleshooting

For any issues, check the bot's FAQ section or contact the server admin. Common issues include:

Bot not responding: Ensure you're using the correct command prefix.

Failed minting: Verify you have sufficient Ravencoin in your wallet.
